

# Certain Activated Carbon Antidumping

Sunset Review Hearing

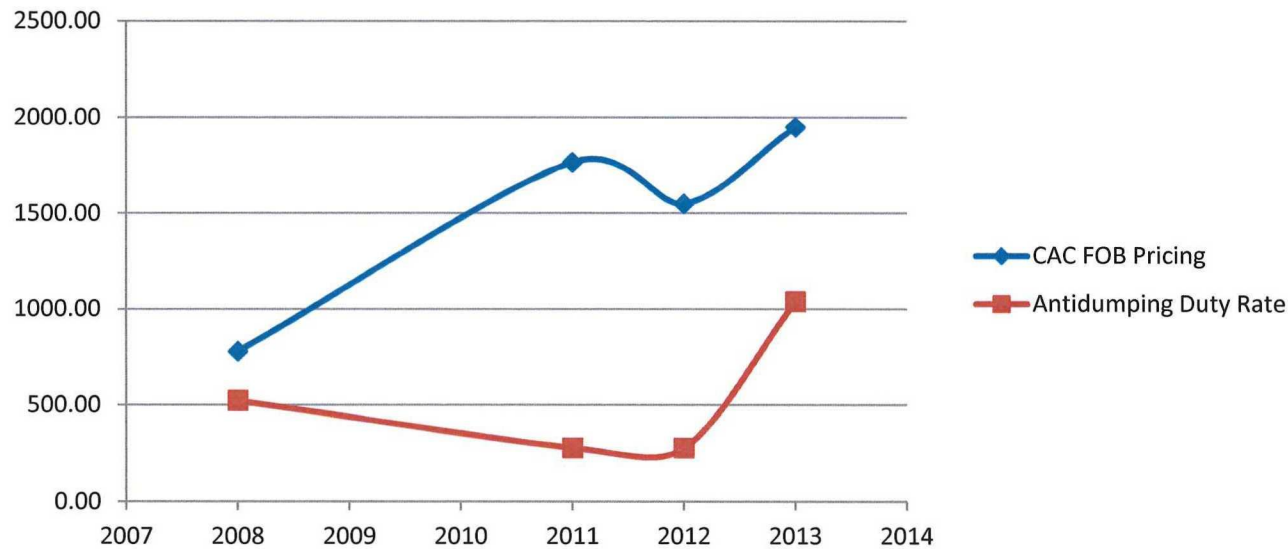

submitted by Arent Fox LLP

## Direct & Reagglomerated Coal Base Activated Carbon are only sometimes “interchangeable”

- This is because currently in the US we have four different groups of Coal Base Activated Carbon customers. They are as follows:
  1. Customers who only want Reagglomerated CAC made in the US,
  2. Customers who want Reagglomerated CAC made either in the US or China,
  3. Customers who only want Direct CAC without binders,
  4. Customers who only want CAC regardless of Reagglomerated or Direct.

Current coal activated carbon prices are higher than what it was during the initiation of the AD order, and there is no reason to believe that pricing will change if the order is revoked.
