Highlights

U.S. production of color television receivers in July-September 1981 amounted to 2.5 million sets, which was about the same as production in the corresponding quarter of 1980 but 247,000 less than in April-June 1981. U.S. producers' shipments of all screen sizes in July-September 1981 totaled 2.5 million sets, which was about the same as shipments in the corresponding period of 1980. Shipments of sets 20 inches and over decreased by 10.0 percent, shipments in the 18- and 19-inch screen-size category increased by 7.6 percent, and those in the 17-inch-and-under category decreased by 4.9 percent.

Total inventories of U.S. producers on September 30, 1981, were 32.0 percent higher than the September 30, 1980, level. Inventories of all screen-size categories ranged from a 3.6-percent decrease in the category of 20 inches and over to an increase of 95.7 percent in the category of 17 inches and under.

Exports of U.S.-made color sets amounted to 134,000 sets in July-September 1981, compared with 121,000 sets in April-June 1981.

The number of all persons and of production and related workers employed by U.S. producers declined by 16.5 and 18.2 percent, respectively, in July-September 1981, compared with figures in the corresponding period of 1980.

Average unit net selling prices of U.S. producers rose for all screen sizes. Compared with prices in July-September 1980 average quarterly prices in July-September 1981 in the 13-inch category increased by \$9.54 (4.0 percent); those in the category of 14 through 17 inches, by \$25.53 (8.5 percent); those in the category of 18 and 19 inches, by \$5.95 (1.9 percent); and those in the 20 inches and over category, by \$19.66 (3.9 percent).

Capsulized Trend Analysis

U.S. production

U.S. production of color television receivers in July-September 1981 amounted to 2.5 million sets, which was about the same as production in July-September 1980 and 19.8 percent higher than in July-September 1979. Compared with production in July-September 1980, production in July-September 1981 was lower in screen-size categories of 17 inches and under and of 20 inches and over, but higher in the category of 18 and 19 inches. The share of production contributed by the screen-size category of 17 inches and under decreased from 22.5 percent to 19.4 percent from the second quarter of 1981 to the third quarter of 1981. The production share of the other two screen-size categories increased slightly during this period.

U.S. producers' shipments

U.S. producers' shipments of color television receivers in July-September 1981, 2.5 million sets, were 5.1 percent greater in quantity than those in the second quarter. They were equal to those in the corresponding period of 1980 and 9.9 percent higher than shipments in the third quarter of 1979. Compared with shipments in the corresponding period of 1980, current shipments increased in the screen-size category of 18 and 19 inches but decreased in the other two categories. Total shipments in July-September 1980 increased 9.8 percent over shipments in the corresponding period of 1979.

U.S. producers' inventories

U.S. producers' inventories of color television receivers at the end of September 1981 were 949,305 units, 32.0 percent higher than the number at the end of September 1980. Quarterly average inventories for July-September 1981

were 23.0 percent higher than inventories in the corresponding period of 1980, but 33.2 percent higher than those in July-September 1979. Stocks of sets 17 inches and under increased by an average of 87.5 percent in the third quarter of 1981 compared with the level in the corresponding period of 1980. In the category of 18 and 19 inches, average inventories increased by 27.1 percent but screen sizes of 20 inches and over decreased by 9.9 percent. Compared with the inventories of April-June 1981, current average quarterly inventories for screen-size categories 17 inches and under were 7.6 percent lower; those for 18 and 19 inches, 12.8 percent lower; and those for 20 inches and over, 21.8 percent lower.

U.S. producers' exports

U.S. producers' exports of color television receivers amounted to 134,217 sets during July-September 1981, compared with 120,925 sets exported during April-June 1981. The category of 18 and 19 inches accounted for 76,210 sets, or 56.8 percent of total exports.

U.S. employment

Employment in U.S. producers' establishments maintained the general decline in both production and related workers and in managerial employees. The average number of production and related workers employed during July-September 1981 was 17,830 persons, down 18.2 percent from 21,786 persons in the corresponding period of 1980. The average number of all workers was 20,843, down from 24,947 in July-September 1980. Also, the number of man-hours worked by production and related workers was 8.7 million in July-September 1981, down from 10.8 million in the corresponding period of 1980.

This continuing decrease in employment and man-hours worked is believed to be the result of increasing imports of major subassemblies and the increasing use of integrated circuits in color television receivers, both of which reduce the amount of assembly labor required.

Prices

Average unit net selling prices of U.S. producers were higher for all major screen-size categories during July-September 1981 compared with those in the corresponding quarter of 1980. The average prices of the 13-inch size increased by \$9.54 (4.0 percent); those of the 14- through 17-inch category by \$25.53 (8.5 percent); those of the 18- and 19-inch sizes by \$5.95 (1.9 percent); and those of the sets 20 inches and over increased by \$19.66 (3.9 percent). These increases are well under the inflation rate as measured by the Consumer Price Index.

Screen-size categories showed increased average quarterly prices during July-September 1981 compared with prices in the second quarter of the year. Prices in the 13-inch category increased by \$6.50; those for 14- through 17-inch sizes increased by \$21.15; those for the 18- and 19-inch sizes, by \$4.33; and those for the 20-inches-and-over sizes, by \$13.64.
