NOTE

The August 1983 report reflects revisions in certain tables, resulting from revisions in 1981 producers' shipments statistics and updated information on imports and exports. As a result of these adjustments, foreign trade statistics presented may not conform to data published by the U.S. Bureau of the Census. Trade figures were adjusted in the following product areas: carbon steel wire rod (imports), hot-rolled alloy steel bar (exports), and carbon and alloy steel rail (imports).

Preface

On February 16, 1983, at the request of the Subcommittee on Trade, Committee on Ways and Means, U.S. House of Representatives, and in accordance with the provisions of section 332(b) of the Tariff Act of 1930 (19 U.S.C. 1332(b)), the United States International Trade Commission instituted investigation No. 332-153, Monthly Report on Selected Steel Industry Data. The purpose of the report is to gather and compile data on the U.S. steel industry from public sources and report such data to the subcommittee on a monthly basis through December 1985.

On October 21, 1982, the Arrangement Concerning Trade in Certain Steel Products between the European Coal and Steel Community and the United States (the Arrangement) became effective. The text of the Arrangement is published in the Federal Register of October 29, 1982 (47 F.R. 49060). Under the terms of the Arrangement, exports of certain steel products from the European Community to the United States are to be limited to a percentage of apparent U.S. consumption from November 1, 1982, through December 31, 1985. The 15 steel products subject to the Arrangement (for which a concordance between shipment, import, and export data was developed), the 10 product categories into which they are grouped, and the percentages of apparent consumption to which exports are to be limited are as follows:

1. Hot-rolled sheet and strip (6.81 percent):
Hot-rolled carbon sheet and strip
Hot-rolled alloy sheet and strip
2. Cold-rolled sheet (5.11 percent):
Cold-rolled carbon sheet
Cold-rolled alloy sheet
3. Plate (5.36 percent):
Carbon plate
Alloy plate
4. Structural shapes (9.91 percent):
Carbon structural shapes
Alloy structural shapes
5. Wire rod (4.29 percent):
Carbon wire rod
6. Hot-rolled bar (2.38 percent):
Hot-rolled carbon bar
Hot-rolled alloy bar
7. Coated sheet (3.27 percent):
Carbon and alloy coated sheet and terne
plate and sheet
8. Tin plate (2.20 percent):
Tin plate
9. Rails (8.90 percent):
Carbon and alloy rails
10. Sheet piling (21.85 percent):
Carbon and alloy sheet piling.

This monthly report includes data on steel shipments, imports, exports, apparent consumption, import market share, and selected prices available for the 15 products subject to the Arrangement on monthly, quarterly and annual bases. In addition, information on total U.S. steel production, shipments, employment, imports, exports, apparent consumption, import market share, and average prices is provided so that developments regarding products subject to the Arrangement can be assessed in a broader context.

Notes on product coverage and methodology

The following points regarding product coverage should be noted. First, the Tariff Schedules of the United States Annotated (TSUSA) classifies hot- and cold-rolled alloy strip in the same TSUSA item; import data shown for hot-rolled alloy sheet and strip (tables 8 and 9) are, therefore, most likely overstated. Second, certain semifinished products classified in the TSUSA as plate have been excluded from the Arrangement; since the TSUSA does not separately identify these semifinished products, import data shown for carbon plate (tables 14 and 15) and alloy plate (tables 16 and 17) may be overstated. The effect of overstatement in these three product areas on the aggregate import data for the 15 products subject to the Arrangement (tables 4 and 5) is minimal. Imports of hot- and cold-rolled alloy strip represent a small portion of total imports; moreover, inquiries made by the Commission staff to Customs and industry sources indicate that imports of semifinished products classified as plate under the TSUSA probably represent a small percentage of total plate imports.

Monthly and quarterly data may not add to quarterly and annual totals, respectively, owing to rounding and data revisions. The term "negligible" in this report refers to values less than \$500, quantities less than 500 short tons (table 3), or quantities less than 0.5 short ton (tables 4-35). Unit values are calculated using unrounded data. Import values are customs value. Imports of steel mill products in tables 2 and 3 based on definition used by the American Iron and Steel Institute (AISI). To maintain consistency, however, the deletion by the AISI of TSUSA item 642.3560 in 1983 is not reflected. Imports of this item totaled 382 tons in 1981 (\$295,000) and 1,162 tons in 1982 (\$360,000).
