PREFACE

On October 5, 1987, upon the request of the United States Trade Representative, at the direction of the President, (see app. A for a copy of the request) and in accordance with section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)), the United States International Trade Commission instituted investigation No. 332-250. Appendix B contains the institution notice. The purpose of this study is to provide (1) a cross-reference between the 7-digit statistical reporting numbers of the Tariff Schedules of the United States Annotated (1987) and the 8-digit tariff subheadings of the proposed Harmonized Tariff Schedule of the United States (see Annex I and Annex II) and (2) two statistical compilations. Of the two statistical compilations, the first reflects the estimated customs value of U.S. imports for the period 1983-87, total and by supplying country, in terms of the 8-digit tariff subheadings of the proposed Harmonized Tariff Schedule of the United States and the second reflects the estimated value of U.S. exports for the period 1983-87, total and by country of destination, in terms of the 10-digit reporting numbers of the proposed Harmonized System-based Schedule B. The two historic trade statistics compilations will be published separately and made available by May 31, 1988.

INTRODUCTION

This report is issued pursuant to investigation No. 332-250, instituted on October 5, 1987 (52 F.R. 38282), in response to a request by the United States Trade Representative (USTR) at the direction of the President of the United States. In his letter to the Chairman dated September 22, 1987, the USTR stated that users of U.S. international trade statistics, both in the Government and the private sector, have expressed concern that implementation of the Harmonized Commodity Description and Coding System (HS) 1/ will result in a break in continuity of the statistical categories in which U.S. imports and exports are officially reported and published.

Consequently, the USTR requested the Commission to compile the following three reports:

(1) A cross-reference between the current Tariff Schedules of the United States Annotated (TSUSA) and the proposed Harmonized Tariff Schedule of the United States (HTS) 2/;

(2) A statistical compilation reflecting the estimated customs value of U.S. imports for consumption for the years 1983 through 1987, total and by supplying country, in terms of the 8-digit tariff subheadings of the proposed HTS; and

1/ The HS is a nomenclature system developed by the Customs Cooperation Council for use in the classification of goods for customs tariff, statistical, and transport documentation purposes. For a detailed description of the HS, see Interim Report on the Harmonized Commodity Description and Coding System, USITC Publication 1106, November 1980.

2/ HTS refers to the current version of the proposed HS-based import tariff. See Harmonized Tariff Schedule of the United States, Annotated for Statistical Reporting Purposes, USITC Publication 2030. The original HS-based tariff conversion was developed by the Commission in its investigation No. 332-131. See Submitting Report on Conversion of the Tariff Schedules of the United States Annotated Into the Nomenclature Structure of the Harmonized System, USITC Publication 1400, June 1983.

Subsequent to the Commission's report, the Trade Policy Staff Committee and the Office of the United States Trade Representative, published three revised draft HS-based import tariffs:

- (1) Conversion of the Tariff Schedules of the United States Into the Nomenclature Structure of the Harmonized System, Revised, Showing Administrative Changes Approved by the Trade Policy Staff Committee, September 1984.
- (2) Conversion of the Tariff Schedules of the United States Into the Nomenclature Structure of the Harmonized System, Revised, Showing Administrative Changes Approved by the Trade Policy Staff Committee, October 1986.
- (3) Proposed United States Tariff Schedule Annotated in the Harmonized System Nomenclature, July 1987.

- (3) A statistical compilation reflecting the estimated value of U.S. exports for the years 1983 through 1987, by total and by country of destination, in terms of the 10-digit subheadings of the proposed HS-based Schedule B 1/.

In his letter the USTR asked that the TSUSA/HTS cross-reference be submitted no later than January 31, 1988, that the statistical compilations be submitted no later than May 31, 1988, and that the Commission arrange for these reports to be available to the public in printed form and on microfiche through the National Technical Information Service (NTIS) and on magnetic media through the Bureau of the Census (Census 2/).

The Commission has divided its investigation into two phases. Phase I consists of this report accompanied by Annex I and Annex II (TSUSA/HTS and HTS/TSUSA cross-references, respectively). Phase II will involve compilation and dissemination of the export and import trade tables (to be published separately).

1/ See U.S. Department of Commerce, Bureau of the Census publication: Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported From the United States, 1988 Edition. Note that this edition includes cross-reference tables between the 1987 TSUSA-based Schedule B and the 1988 HS-based Schedule B.

2/ Because of the expected widespread interest in obtaining the TSUSA/HTS cross-references, the Commission determined that the Phase I reports in printed form should be made available through the U.S. Government Printing Office as well as the NTIS. Copies of the Phase I reports in printed form as well as in microform or on magnetic media may be obtained from NTIS. Phase II reports in printed form and in microfiche will only be available from the NTIS. Phase II reports on magnetic media will be available from Census.

THE TSUSA/HTS AND HTS/TSUSA CROSS-REFERENCES

Cross-references between the TSUSA and the HTS and the HTS and the TSUSA are contained in Annexes I and II to this report, respectively. Except for the special situations described below, these cross-references are set out in terms of 7-digit statistical numbers contained in the Tariff Schedules of the United States Annotated (1987) as supplemented on June 10, 1987, and 8-digit subheadings provided in the Harmonized Tariff Schedule of the United States Annotated for Statistical Reporting Purposes.

The cross-references are designed to assist the international trade community in translating a known classification in the TSUSA into a likely classification under the HTS. The user is strongly cautioned against relying on the cross-references in order to determine legally appropriate tariff classifications under the HTS. Such determinations can only be made by the U.S. Customs Service and depend upon the condition of an article as imported, the applicable article provisions and rules of classification set out in the HTS, and the body of customs practices and regulations relevant to the importation. These cross-references are not intended, nor should they be viewed as a substitute for, the traditional tariff classification process.

Every effort has been made to ensure the accuracy of the alignment between the listed TSUSA numbers and HTS subheadings. All TSUSA numbers have been aligned with at least one HTS subheading. Similarly, all HTS subheadings have been referenced to at least one TSUSA number or headnote. 1/ Nevertheless, these cross-references do not include all possible TSUSA/HTS combinations. We believe that inclusion of every conceivable pairing would seriously reduce the utility of the cross-references by introducing unnecessary complexity and ambiguity. Consequently, the cross-references are only indicative of the likely classification of articles for which there is reported import trade.

Methodology

The cross-references were derived by reviewing each TSUSA number and its associated article description and then, to the extent practicable, identifying the article or range of articles believed to be classified under that number. Each such article was considered under the terms of the HTS, and the applicable subheading or subheadings were identified and recorded. In cases where the TSUSA number represented a residual category covering a broad range of articles that were not individually distinguishable, the process was essentially reversed and HTS subheadings believed to cover those articles were reviewed and aligned with the corresponding TSUSA number.

1/ Note that certain HTS subheadings (for example, 2716.00, 8901.10, and 8904.00) have no equivalent TSUSA number since they describe goods listed in general headnote 5 to the Tariff Schedules of the United States that are identified as "intangibles." Intangibles are articles not subject to the provisions of the TSUS.

Each TSUSA/HTS pairing was reexamined as to whether or not it should be included in the cross-reference. The principal consideration in reaching a decision was to ensure that each TSUSA number was referenced to at least one HTS subheading and similarly that each HTS subheading had a basis in the TSUSA. The other major consideration was a determination as to whether the products covered by a TSUSA/HTS pairing were ever imported into the United States, and if so, whether such imports had a significant value. When it was determined that the likelihood of U.S. imports of the covered product was merely speculative or hypothetical and no other considerations came into play, the pairing was generally not included in the cross-reference.

The cross-references compiled by the Commission's staff were submitted to the U.S. Customs Service for review and comment. Their comments were fully considered and incorporated to the extent necessary to prepare the cross-references that accompany this report.

Special Situations

Certain woven fabrics

The statistical reporting system applicable to TSUS items 320.01 through 331.98 provides for literally thousands of possible 7-digit statistical numbers, many of which involve nil or negligible trade. In order to avoid inclusion in the cross-references of a large body of unused 7-digit numbers attributable to these TSUS items, we have used 5-digit numbers that parallel Census trade reporting numbers instead.

There are 120 5-digit numbers used by Census in reporting import trade under TSUS items 320.01 through 331.98. They reflect a consolidation of the fourth and fifth digits of the TSUS items. For example, TSUS items 320.01 through 320.09 are shown in the cross-reference under 320.09. The fourth and fifth digits of these TSUS items have been replaced as follows:

<u>Range of actual fourth and fifth digits:</u>	<u>Census designators as shown in the cross-references:</u>
01-09.....	.09
10-19.....	.19
20-29.....	.29
30-39.....	.39
40-49.....	.49
50-59.....	.59
60-69.....	.69
70-79.....	.79
80-88.....	.89
92-98.....	.99

The statistical suffixes applicable to TSUS items 320.01 through 331.98 have been replaced with double zeros. The double zeros are shown in order to facilitate data processing and should not be considered.

The treatment of TSUS item 338.50 in the cross-reference is similar to that of items 320.01 through 331.98 and the same adjustments apply.

Watches, clocks with watch movements, and watch movements

The tariff classification and statistical reporting system applicable to watches, clocks with watch movements, and watch movements under the TSUS is extremely convoluted. In order to produce a workable cross-reference, the general principles described earlier were abandoned, and a somewhat different approach was devised. As a result, with respect to these articles certain 7-digit numbers shown in the TSUSA columns of the cross-references are not TSUSA numbers but Census trade reporting numbers. At the same time some 7-digit TSUSA numbers covering these articles are not included in the listings. These exceptions are as follows:

- (1) All 7-digit numbers shown in the TSUSA column beginning with 715 or 716. These numbers, which cover watches and clocks with watch movements, are the numbers used by Census in publishing import trade statistics rather than the TSUSA numbers used on Customs entry forms.
- (2) TSUSA numbers beginning with 716.37, 716.38, 716.39, 716.40, 716.45, and 719. Of these numbers, which cover watch movements, only those for which import trade was reported in the period 1983-86 are listed.

HISTORICAL TRADE DATA COMPILATIONS

As noted above, the historical trade data compilations requested by the USTR are to be submitted by May 31, 1988, and as a consequence will be issued separately as Annex III (import trade data compilation) and Annex IV (export trade data compilation) to this report.

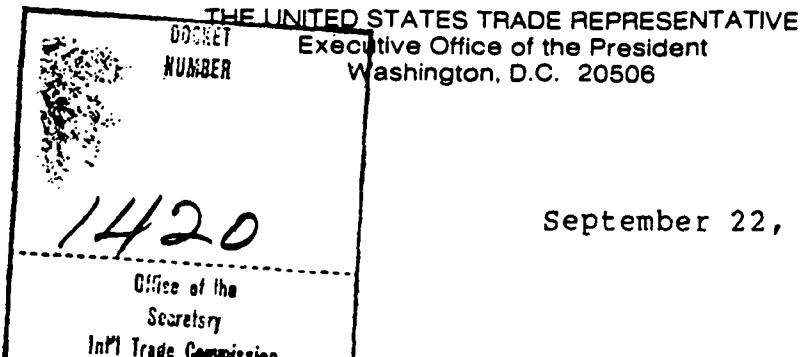

The import trade data compilation tables will be arranged by 8-digit HTS subheading and show an abbreviated article description, a list of countries from which those articles were imported during the period 1983-87, and the customs value of those imports for each year of the period 1983-87.

These tables will be derived by merging two computerized databases. The first is a correlation prepared by the Commission between 8-digit HTS subheadings and all 7-digit numbers (either TSUSA numbers or Census special reporting numbers) under which import trade was reported during the period 1983 through 1987. The second is a consolidated database of selected import trade data for the period 1983-87 as published by Census.

The export trade data compilation tables will correspond to the import trade tables, except that 10-digit Schedule B numbers and article descriptions will be shown and export markets will be listed. The export trade data tables will be derived in a similar manner to those for imports except that the correlation between the 10-digit HS-based Schedule B and Schedule B numbers in use during the period 1983-87 will be principally prepared by Census.

APPENDIX A

REQUEST FROM THE UNITED STATES TRADE REPRESENTATIVE

SEP 29 '87

September 22, 1987

The Honorable Susan Liebeler
Chairman
U.S. International Trade Commission
701 E Street, N.W.
Washington, D.C. 20436

Dear Madam Chairman:

The Administration recently sent proposed legislation to the Congress which would enable implementation of the Harmonized Commodity Description and Coding System (the Harmonized System). As you know the internationally agreed date for the major trading countries, including the United States, to implement the system is January 1, 1988.

As our work toward this goal has progressed over the past few years, users of statistics on U.S. trade, both in government and the private sector, have expressed concern over the inevitable break which will occur in the continuity of the statistical categories in which U.S. imports and exports are officially reported and published, and the difficulties which this break will create for the analyses of U.S. trade flows for past, current and future years, especially at disaggregated product line levels. To ameliorate this problem, it is desirable to provide a means for data users to bridge the existing and new classification systems.

Accordingly, at the direction of the President, pursuant to section 332(g) of the Tariff Act of 1930, I request the Commission to provide the following reports to the U.S. Trade Representative in printed form, microfiche and on magnetic media:

- (1) a cross-reference between the current Tariff Schedules of the United States Annotated and the proposed Harmonized Tariff Schedule of the United States;
- (2) a statistical compilation reflecting the estimated customs value of U.S. imports for consumption for the years 1983-1987, total and by supplying country, in terms of the 8-digit tariff subheadings of the proposed Harmonized Tariff Schedule of the United States;

The Honorable Susan Liebeler
September 22, 1987
Page Two

- (3) a statistical compilation reflecting the estimated value of U.S. exports for the years 1983-1987, total and by country of destination, in terms of the 10-digit subheadings of the proposed Harmonized System-based Schedule B.

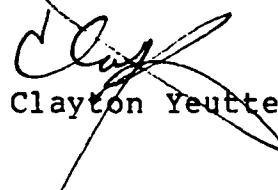

The Commission should also arrange for these reports to be available to the public in printed form and microfiche through the National Technical Information Service, and on magnetic media through the Bureau of the Census.

The cross-reference should be submitted no later than January 31, 1988, and the statistical compilations should be submitted no later than May 31, 1988. The reports should be made available to the public simultaneously with their submission to the United States Trade Representative.

The Commission in undertaking this task should avail itself of the expertise and services of the U.S. Customs Service and the Bureau of the Census and other agencies of the Executive Branch which may be able to assist in the project. I am hereby requesting the agencies to cooperate fully with the Commission in expediting completion of its work.

The provision of this data by the Commission will constitute an important and greatly appreciated service.

Sincerely,

Clayton Yeutter

CY:mam

APPENDIX B

NOTICE OF INVESTIGATION

UNITED STATES INTERNATIONAL TRADE COMMISSION
Washington, D.C.

(332-250)

Continuity of Import and Export Trade Statistics
After Implementation of the Harmonized Commodity
Description and Coding System

AGENCY: United States International Trade Commission

ACTION: Institution of investigation

SUMMARY: Following receipt of a request of from the United States Trade Representative (USTR) at the direction of the President, the Commission instituted investigation No. 332-250 under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)), for the purposes of preparing a cross-reference between the current Tariff Schedules of the United States Annotated (TSUSA) and the proposed Harmonized Tariff Schedule of the United States (HTS) and compiling statistical tables reflecting U.S. import and export trade for the years 1983-1987 in terms of proposed 8-digit HTS subheadings and 10-digit Harmonized System-based Schedule B (Schedule B) numbers, respectively.

EFFECTIVE DATE: October 5, 1987

FOR ADDITIONAL INFORMATION CONTACT: Mr. Holm Kappler, Deputy Director (telephone 202-523-0362), or Mr. Lawrence DiRicco, Nomenclature Analyst (telephone 202-523-4953), Office of Tariff Affairs and Trade Agreements, U.S. International Trade Commission, Washington D.C. 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting our TDD terminal on (202) 724-0002.

SUPPLEMENTARY INFORMATION: In order to provide the international trade community with a means to maintain a reasonable degree of continuity in historical statistical data after the transition to HTS and HS-based Schedule B statistical reports, the USTR at the direction of the President requested the Commission to prepare: (1) a cross-reference between the current TSUSA and the proposed HTS, (2) a statistical compilation reflecting the estimated total value of U.S. imports for consumption for the years 1983-1987, both by country and in the aggregate, in terms of proposed 8-digit HTS subheadings, and (3) a statistical compilation reflecting the estimated total value of U.S. exports for the years 1983-1987, both by country of destination and in the aggregate, in terms of the 10-digit Schedule B numbers.

The USTR requested that the Commission report on the TSUSA to proposed HTSUS cross-reference no later than January 31, 1988, and on the trade statistics compilations no later than May 31, 1988, and that the Commission arrange for these reports to be available to the public in printed form and microfiche through the National Technical Information Service and on magnetic media through the Bureau of the Census.

The Commission does not plan to hold a public hearing or seek written statements or other information from interested parties in this matter.

By order of the Commission.

Kenneth R. Mason
Secretary

Issued: October 6, 1987
