USITC REPORTS RESULTS OF SURVEY OF THE SPECIALTY STEEL INDUSTRY

The United States International Trade Commission has completed its tenth quarterly survey of U.S. producers in connection with the quantitative limitations imposed on imports of specialty steel. The survey, required by Presidential Proclamation No. 4445, covers the third quarter of 1978.

Major findings of the survey indicate that total stainless and alloy tool steel shipments increased from 256,269 tons in the third quarter of 1977 to 291,685 tons in the third quarter of 1978, or by about 14 percent.

The average number of production and related workers employed in the specialty steel industry increased from 18,138 in the third quarter of 1977 to 19,516 in the third quarter of 1978, or by about 8 percent. Increases in employment occurred in all stainless steel and alloy tool steel categories.

Man-hours worked in the specialty steel industry increased from 8.4 million man-hours in July-September 1977 to 9.2 million man-hours in the corresponding period of 1978, or by about 10 percent. Man-hours worked increased in all product categories except stainless steel bar.

more

USITC REPORTS RESULTS OF THE SPECIALTY STEEL INDUSTRY

2

Average quarterly prices increased for 9 of 16 products surveyed, decreased for 5 products, and were unchanged for 2 products compared to the last quarterly period. The average price increase was 3.1 percent and the average price decrease was 2.8 percent.

Copies of the report (USITC Publication) can be obtained by calling (202) 523-5178 or from the Office of the Secretary, 701 E St. NW., Washington, D.C. 20436.
