# ITC READER SATISFACTION SURVEY

## *Monitoring of U.S. Imports of Tomatoes*

The U.S. International Trade Commission (ITC) is interested in your voluntary comments (burden < 15 minutes) to help us assess the value and quality of our reports, and to assist us in improving future products. Please return survey by fax (202-205-2384) or by mail to the ITC.

Your name and title (please print; responses below not for attribution): \_\_\_\_\_

Please specify information in this report most useful to you/your organization: \_\_\_\_\_

Was any information missing that you consider important?                      Yes (specify below)                      No

If yes, please identify missing information and why it would be important or helpful to you: \_\_\_\_\_

Please assess the *value* of this ITC report (answer below by circling all that apply): SA—Strongly Agree; A—Agree; N—No Opinion/Not Applicable; D—Disagree; SD—Strongly Disagree

" Report presents new facts, information, and/or data	SA	A	N	D	SD
" Staff analysis adds value to facts, information, and/or data	SA	A	N	D	SD
" Analysis is unique or ground breaking	SA	A	N	D	SD
" Statistical data are useful to me/my organization	SA	A	N	D	SD
" Subject matter and analysis are timely	SA	A	N	D	SD
" ITC is the only or the preferred source of this information	SA	A	N	D	SD

If not, please identify from what other source the information is available \_\_\_\_\_

Please evaluate the *quality* of this report (answer below by circling all that apply): SA—Strongly Agree; A—Agree; N—No Opinion/Not Applicable; D—Disagree; SD—Strongly Disagree

" Written in clear and understandable manner	SA	A	N	D	SD
" Report findings or executive summary address key issues	SA	A	N	D	SD
" Figures, charts, graphs are helpful to understanding issue	SA	A	N	D	SD
" Analysis throughout report answers key questions	SA	A	N	D	SD
" Report references variety of primary and secondary sources	SA	A	N	D	SD
" Sources are fully documented in text or footnotes	SA	A	N	D	SD

Please provide further comment on any of the above performance measures, as appropriate:

## **Monitoring of U.S. Imports of Tomatoes**

Investigation No. 332-350

**Publication 3473**

**November 2001**

# Preface

---

Section 316 of the North American Free-Trade Agreement Implementation Act (NAFTA Implementation Act), Public Law 103-182, requires the U.S. International Trade Commission (Commission) to monitor U.S. imports of "fresh or chilled tomatoes" and "fresh or chilled peppers, other than chili peppers," until January 1, 2009. As a result, the Commission instituted investigation No. 332-350, Monitoring of U.S. Imports of Tomatoes, and investigation No. 332-351, Monitoring of U.S. Imports of Peppers, under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)). This report on the Commission's monitoring investigation covers tomatoes for fresh-market use and for processing. The purpose of this monitoring, as expressed in the NAFTA Implementation Act, is to permit the Commission to conduct an expedited investigation and, if appropriate, recommend to the President provisional relief should a petition for relief be filed under section 202 of the Trade Act of 1974 with respect to imports from all countries, or a petition requesting such relief be filed under section 302 of the NAFTA Implementation Act with respect to imports from Canada or Mexico. Generally, such provisional relief would remain in effect, pending completion of the investigation by the Commission and the taking of final action by the President.

This report contains statistical information gathered by the Commission on the U.S. tomato industry in the course of its monitoring. This information includes (1) consumption and trade data (including U.S. imports and U.S. exports) and (2) other industry data (including U.S. production quantity, value, unit value, and harvested area; U.S. cost-of-production estimates; shipments; U.S. weekly shipping-point quantities available; and average U.S. retail and shipping-point prices). The information presented in this report on the U.S. tomato industry was obtained from a number of sources, including the U.S. Department of Agriculture, the U.S. Department of Commerce, the Florida Tomato Committee, the University of Florida Cooperative Extension Service, and various other State agencies. This report principally covers 1996-2000 data and partial-year data for 2000 and 2001.<sup>1</sup>

---

<sup>1</sup> Nothing in this report should be construed to indicate how the Commission would find in an investigation conducted under other statutory authority covering the same or similar subject matter.

46. Fresh-market tomatoes: Average f.o.b. prices of Florida shipments, by maturity and by weeks, 1997/98 to 1999/2000 crop-years . . . . .	72
47. Fresh-market tomatoes: Average shipping-point prices for 85 percent U.S. No. 1 or better grade mature-green tomatoes f.o.b. Florida, by size and by weeks, 1999/2000 crop-year . . . . .	73
48. Fresh-market tomatoes: Average shipping-point prices for U.S. No. 1 or better grade mature-green tomatoes f.o.b. Florida, by size and by weeks, 2000/01 crop-year . . . . .	74
49. Fresh-market tomatoes: Average shipping-point prices for U.S. combination grade and U.S. No. 2 grade mature-green tomatoes f.o.b. Florida, by size and by weeks, 1999/2000 crop-year . . . . .	75
50. Fresh-market tomatoes: Average shipping-point prices for U.S. No. 2 mature-green tomatoes f.o.b. Florida, by size and by weeks, 2000/01 crop-year . . . . .	76
51. Fresh-market tomatoes: Average shipping-point prices of border-crossings from Mexico f.o.b. Nogales, AZ, by container, by size, and by weeks, 1998/99 crop-year . . . . .	77
52. Fresh-market tomatoes: Average shipping-point prices of border-crossings from Mexico f.o.b. Nogales, AZ, by count and by weeks, 1999/2000 crop-year . . . . .	78
53. Fresh-market tomatoes: Average shipping-point prices of greenhouse-grown, vine-ripe border-crossings from Mexico f.o.b. Nogales, AZ by count and by weeks, 2000/01 crop-year . . . . .	79
54. Fresh-market tomatoes: Average shipping-point prices of vine-ripe border-crossings from Mexico f.o.b. Nogales, AZ, by container, by size, and by weeks, 1999/2000 crop-year . . . . .	80

# Highlights

---

The following are highlights of the statistical data collected on tomatoes for fresh-market use and processing for the 1996-2000 period.

## Fresh-market Tomatoes

---

- I Apparent U.S. consumption remained steady at 2.2 million metric tons in 1998-2000, up by 7 percent from 2.1 million metric tons in 1996; consumption in 2000 was valued at \$1.6 billion (table 1). The ratio of import volume to consumption in 2000 was 33 percent, down from 35 percent in 1996. U.S. production of tomatoes for fresh-market use was up by 10 percent from 1.53 million metric tons in 1996 to 1.68 million metric tons in 2000 (table 1). The value of production rose from \$947 million in 1996 to \$1.2 billion in 2000, with a unit value of \$0.69 per kilogram in 2000.
  
- I Florida and California have been the two States with the largest amount of production of fresh-market tomatoes since 1996, accounting for 42 percent and 30 percent, respectively, of total U.S. production volume of tomatoes for fresh-market use in 2000 (table 30). Other States with significant production volume during 1996-2000 included Virginia, Georgia, Ohio, Tennessee, South Carolina, and New Jersey. Since 1996, production volume has trended downward in South Carolina, but upward in all other major producing States. Fresh tomatoes are harvested in Florida during October-June and California primarily during June-November, with harvesting in most other States occurring during March-September. U.S. harvested area of fresh-market tomatoes was up by 7 percent from 120,640 acres in 1996 to 128,720 acres in 2000 (table 30). In 2000, California and Florida each accounted for 33 percent of total U.S. harvested area of tomatoes for fresh-market use. During the 1996-2000 period, harvested area in California and Florida rose irregularly through 1999, but then fell through 2000. During the 1996-2000 period, harvested area rose in every major producing State except South Carolina and New Jersey.
  
- I U.S. exports of fresh-market tomatoes rose by 39 percent from 134,011 metric tons in 1996 to 186,052 metric tons in 2000, and by 63 percent from \$99.7 million in 1996 to \$162.3 million in 2000 (table 1). U.S. export volume was down by 7 percent during January-June 2001 as compared with exports during the corresponding months in 2000. Canada was the leading market for U.S. exports of fresh-market tomatoes throughout the 1996-2000 period, accounting for 78 percent of the total volume (75 percent of value) in 2000 (table 3).
  
- I U.S. imports of fresh-market tomatoes fell slightly from 737,150 metric tons in 1996 to 730,063 metric tons in 2000 (table 1). Imports were valued at \$640.3 million in 2000, down by 5 percent from the value in 1996. Imports were up by 27 percent by volume during January-June 2001 as compared with imports during the corresponding months in 2000. Mexico, the leading supplier of imports throughout the 1996-2000 period, accounted for 81 percent, by volume, of total imports of fresh-market tomatoes in 2000 (table 5). U.S. imports of fresh-market tomatoes from Canada, although accounting for a small share of total imports in 1996, rose by 366 percent by volume from 1996 to 2000 and accounted for 14 percent of total imports in 2000. The bulk of imports from Canada are believed to have been greenhouse-grown tomatoes.

- I U.S. imports of cherry tomatoes fell steadily from 51,665 metric tons in 1998 to 39,153 metric tons in 2000, with Mexico accounting for 97 percent of total imports in 2000 (table 6). Import value declined from \$63.2 million in 1999 to a low of \$42.8 million in 2000. Imports were down by 6 percent in January-June 2001 as compared with import volume in January-June 2000. U.S. imports of roma tomatoes amounted to 246,808 metric tons in 2000, up by 15 percent from 214,054 metric tons in 1996, but down by 8 percent from a recent high of 268,108 metric tons in 1998. Mexico accounted for 99 percent annually of total imports during the 1996-2000 period (table 7). Imports of roma tomatoes amounted to 207,477 metric tons in January-June 2001, up by 47 percent from 141,040 metric tons in January-June 2000.
  
- I U.S. imports of fresh-market tomatoes from Mexico, entered on a July-June crop-year basis, amounted to 711,817 metric tons in July 2000-June 2001, up by 20 percent from 593,766 metric tons in July 1999-June 2000 (table 9). In recent years, about two-thirds annually of total U.S. imports of fresh-market tomatoes from Mexico entered through the Nogales Customs District. Most of the remainder entered through the San Diego district. During the July 1998-June 1999 to July 2000-June 2001 crop-years, over one-half of total average annual imports from Mexico entered during January-April. Historically, U.S. imports from Mexico are greatest during this 4-month period.
  
- I U.S. imports of fresh-market tomatoes from Canada, entered on a July-June crop-year basis, rose by 51 percent from 69,478 metric tons in 1998/99 to 105,165 metric tons in 2000/01. Imports from Canada were valued at \$169.4 million in July 2000-June 2001, up by 57 percent from \$108.0 million in July 1998-June 1999 (table 10). During July 2000-June 2001 about 61 percent of total U.S. import volume of fresh-market tomatoes from Canada entered through the Detroit and Buffalo Customs districts. Most of the remaining imports entered through the Seattle district. During the same July 2000-June 2001 period, 46 percent of total crop-year import volume from Canada entered during March-June, coinciding with the latter half of the normal Florida shipping season.
  
- I U.S. imports of fresh-market tomatoes from the Netherlands, entered on a July-June crop-year basis, fell by 24 percent from 36,941 metric tons in 1998/99 to 28,106 metric tons in 2000/01 (table 11). Imports from the Netherlands were valued at \$51.2 million in July 2000-June 2001. During July 2000-June 2001, about 49 percent of total imports from the Netherlands entered through the New York and Boston Customs districts. During the same July 2000-June 2001 period, about one-third of total annual imports entered during March-June, coinciding with the latter half of the normal Florida shipping season.
  
- I U.S. imports of fresh-market tomatoes from the European Union, entered on a July-June crop-year basis, fell by 25 percent from 45,850 metric tons in 1998/99 to 34,420 metric tons in 2000/01 (table 12). Imports were valued at \$61.0 million in 2000/01, down by 25 percent from \$81.4 million in 1998/99. During the July 2000-June 2001 period, 59 percent of total imports entered through the New York and Boston Customs districts (table 12). During July 2000-June 2001, 65 percent of imports entered during the November-June period, which coincides with the normal Florida marketing season.
  
- I Average U.S. monthly retail prices of fresh-market tomatoes have trended significantly upward in recent years, from \$1.21 per pound annually in July 1996-June 1997 to \$1.37 per pound annually in July 2000-June 2001 (table 44). Average monthly shipping-point prices trended upward from \$0.30 per pound in 1996/97 to \$0.38 per pound in 2000/01. These prices usually vary a great deal throughout the season. During the 1998/98 to 2000/01 period, average annual crop-year prices for Florida shipments of both mature green and vine ripe tomatoes fell steadily from 1998/99 to 1999/2000, before reaching 3-year highs in 2000/01 (table 45).

## Processed Tomatoes

---

- I U.S. production of tomatoes for processing declined by 5 percent from 10.3 million metric tons in 1996 to 9.9 million metric tons in 2000 (table 2). The value of production was estimated at \$663.5 million in 2000, down by 7 percent from an estimated \$711.0 million in 1996. Unit values remained about the same at \$0.07 per kilogram annually throughout the 1996-2000 period.
- I California, Indiana, and Ohio have been the three States reporting the largest amounts of fresh tomato production for processing since 1996, with production in each of these States accounting for 95 percent, 2 percent, and 1 percent, respectively, of total production volume in 2000 (table 32). U.S. harvested area of tomatoes for processing fell by 15 percent from 339,140 acres in 1996 to 289,600 acres in 2000, with California accounting for 94 percent of total harvested area in 2000.
- I U.S. exports of processed tomatoes amounted to 135,113 metric tons in 2000, down by 6 percent from 142,976 metric tons in 1996; exports were valued at \$97.9 million in 2000 (table 2). Canada, Japan, Korea, and Mexico were the leading U.S. export markets for processed tomatoes in 2000, accounting for 83 percent of total export value in 2000 (table 4). Export volume during January-June 2001 was up by 16 percent over the amount exported during the corresponding period of 2000.
- I U.S. imports of processed tomatoes fell dramatically from a recent high of 174,171 metric tons in 1999 to 56,289 metric tons in 2000 (table 29). Imports were valued at \$93.2 million in 2000, down by 22 percent from \$119.4 million in 1996. Spain, Mexico, and Morocco were the leading sources of imported processed tomatoes in 2000, together accounting for 28 percent of import volume. Imports during January-June 2001 were virtually unchanged in volume as compared with imports during the corresponding period of 2000.

# **CONSUMPTION**

---

**Table 1**  
**Fresh-market tomatoes: U.S. production, exports of domestic merchandise, imports for consumption, apparent consumption, and ratio of imports to consumption, 1996-2000**

Year	Production <sup>1</sup>	Exports <sup>2</sup>	Imports <sup>3</sup>	Apparent consumption	Ratio of imports to consumption

<sup>1</sup> Data are for raw product intended for fresh-market use and are converted from pounds to kilograms using a factor of 2.20462 pounds per kilogram.

<sup>2</sup> Data are for fresh or chilled tomatoes (Schedule B No. 0702.00.0000, 0702.00.0010, 0702.00.0030, and 0702.00.0050) on a fresh-weight basis.

<sup>3</sup> Data are for fresh or chilled tomatoes (Harmonized Tariff Schedule (HTS) subheadings 0702.00.20-0702.00.60) on a fresh-weight basis.

<sup>4</sup> Calculated by the Commission.

<sup>5</sup> Not meaningful.

Note.—Production data are revised annually and data for the most recent calendar years may not match data presented in earlier reports.

Note.—Production data are estimated from raw product intended for fresh-market sales, whereas export and import data are shipments actually recorded. Thus, apparent consumption may be somewhat smaller and the ratio of imports to consumption somewhat larger than shown.

Source: Production data compiled by the Commission from U.S. Department of Agriculture (USDA), National Agricultural Statistics Service (NASS), *Vegetables*, 1998 Summary: Jan. 1999, Vg 1-2(99), pp. 2-3; 1999 Summary: Jan. 2000, Vg 1-2(00), p. 3; and 2000 Summary: Jan. 2001, Vg 1-2(01), p. 5; exports and imports compiled from official statistics of the U.S. Department of Commerce, except as noted.

1998 . . . . .	.07	.72	.86
1999 . . . . .	.08	.79	.96
2000 . . . . .	.07	.72	1.45

<sup>1</sup> Data are for raw product intended for processing and are converted from pounds to kilograms using a factor of 2.20462 pounds per kilogram. U.S. production of processed tomato products on a processed-weight basis has not been reported for a number of years.

<sup>2</sup> Data are for prepared or preserved tomatoes (Schedule B No. 2002.10.0000, 2002.90.0060, and 2002.90.0080) on a processed-weight basis.

<sup>3</sup> Data are for frozen tomatoes (HTS subheadings 0710.80.40-0710.80.50) on a frozen-weight basis; dried tomatoes (HTS subheadings 0710.90.74, 0712.90.75, and 0710.90.78) on a dried-weight basis; and prepared or preserved tomatoes (HTS subheadings 2002.10.00, 2002.90.00, 2002.90.40, and 2002.90.80 ) on a processed-weight basis.

<sup>4</sup> Calculated by the Commission.

Note.—Production data are revised annually and figures for the most recent calendar years may not match data presented in earlier reports.

Note.—Consumption of processed tomato products is not applicable since production is on a raw-product basis and imports include frozen, dried, and canned products on their respective processed-weight basis.

Note.—Unit values for U.S. tomato production are low, relative to those for exports and imports, because production includes only raw product intended for processing, not finished product. Exports and imports are finished products.

<sup>1</sup> Data are for fresh or chilled tomatoes (HTS statistical reporting numbers 0702.00.20-0702.00.60) on a fresh-weight basis.

<sup>2</sup> Calculated by the Commission.

Note.—Because of rounding, figures may not add to the totals shown.

Note.—Unit values for tomatoes from such countries as Canada, Israel, and most EU countries are generally significantly higher than unit values for products from Mexico because they are believed to be primarily greenhouse-grown tomatoes.

<sup>1</sup> Data are for fresh or chilled tomatoes (HTS statistical reporting numbers 0702.00.2030, 0702.00.2035, 0702.00.4030, 0702.00.6030, and 0702.00.6035) on a fresh-weight basis.

<sup>2</sup> Calculated by the Commission.

Note.—Because of rounding, figures may not add to the totals shown.

Note.—Unit values for tomatoes from such countries as Canada, Israel, New Zealand, and most EU countries are generally significantly higher than unit values for products from Mexico because they are believed to be primarily greenhouse-grown tomatoes.
