TARIFF SCHEDULES
OF THE UNITED STATES ANNOTATED
1987

1. Tariff Treatment of Imported Articles. All articles imported into the customs territory of the United States from outside thereof are subject to duty or exempt therefrom as prescribed in general headnote 3.

2. Customs Territory of the United States. The term "customs territory of the United States", as used in the schedules, includes only the States, the District of Columbia, and Puerto Rico.

3. Rates of Duty. The rates of duty in the "Rates of Duty" columns numbered 1 and 2 and the column designated Special of the schedules apply to articles imported into the customs territory of the United States as hereinafter provided in this headnote:

(a) Products of Insular Possessions.

(i) Except as provided in headnote 6 of subpart E of part 2 of schedule 7, and except as provided in headnote 3 of subpart A of part 7 of schedule 7, and except as provided in section 423 of the Tax Reform Act of 1986, articles imported from insular possessions of the United States which are outside the customs territory of the United States are subject to the rates of duty set forth in column numbered 1 of the schedules, except that all such articles the growth or product of any such possession, or manufactured or produced in any such possession from materials the growth, product, or manufacture of any such possession or of the customs territory of the United States, or of both, which do not contain foreign materials to the value of more than 70 percent of their total value (or more than 50 percent of their total value with respect to articles described in section 213(b) of the Caribbean Basin Economic Recovery Act), coming to the customs territory of the United States directly from any such possession, and all articles previously imported into the customs territory of the United States with payment of all applicable duties and taxes imposed upon or by reason of importation which were shipped from the United States, without remission, refund, or drawback of such duties or taxes, directly to the possession from which they are being returned by direct shipment, are exempt from duty.

(ii) In determining whether an article produced or manufactured in any such insular possession contains foreign materials to the value of more than 70 percent, no material shall be considered foreign which either—

- (A) at the time such article is entered, or
- (B) at the time such material is imported

into the insular possession, may be imported into the customs territory from a foreign country, other than Cuba or the Philippine Republic, and entered free of duty; except that no article containing material to which (B) of this subdivision applies shall be exempt from duty under subdivision (i) unless adequate documentation is supplied to show that the material has been incorporated into such article during the 18-month period after the date on which such material is imported into the insular possession.

(iii) Subject to the limitations imposed under section 503(b) and 504(c) of the Trade Act of 1974, articles designated eligible articles under section 503 of such Act which are imported from an insular possession of the United States shall receive duty treatment no less favorable than the treatment afforded such articles imported from a beneficiary developing country under title V of such Act.

(iv) Subject to the provisions in section 213 of the Caribbean Basin Economic Recovery Act, articles which are imported from insular possessions of the United States shall receive duty treatment no less favorable than the treatment afforded such articles when they are imported from a beneficiary country under such Act.

(b) Products of Cuba. Products of Cuba imported into the customs territory of the United States, whether imported directly or indirectly, are subject to the rates of duty set forth in column numbered 1 of the schedules. Preferential rates of duty for such products apply only as shown in the said column 1. 1/

(c) Products of Canada

(i) Products of Canada imported into the customs territory of the United States, whether imported directly or indirectly, are subject to the rates of duty set forth in column numbered 1 of the schedules. The rates of duty for a Canadian article, as defined in subdivision (e)(ii) of this headnote, apply only as shown in the said column numbered 1.

(ii) The term "Canadian article", as used in the schedules, means an article which is the product of Canada, but does not include any article produced with the use of materials imported into Canada which are products of any foreign country (except materials produced within the customs territory of the United States), if the aggregate value of such imported materials when landed at the Canadian port of entry (that is, the actual purchase price, or, if not purchased, the export value, of such materials, plus, if not included therein, the cost of transporting such materials to Canada but exclusive of any landing cost and Canadian duty) was —

(A) with regard to any motor vehicle or automobile truck tractor entered on or before December 31, 1967, more than 60 percent of the appraised value of the article imported into the customs territory of the United States; and

(B) with regard to any other article (including any motor vehicle or automobile truck tractor entered after December 31, 1967), more than 50 percent of the appraised value of the article imported into the customs territory of the United States.

(d) Products of Communist Countries. Notwithstanding any of the foregoing provisions of this headnote, the rates of duty shown in column numbered 2 shall apply to products, whether imported directly or indirectly, of the following countries and areas pursuant to section 401 of the Tariff Classification Act of 1962, to section 231 or 257(e)(2) of the Trade Expansion Act of 1962, or to action taken by the President thereunder: 2/ 1

1/ By virtue of section 401 of the Tariff Classification Act of 1962, the application to products of Cuba of either a preferential or other reduced rate of duty in column 1 is suspended. See general headnote 3(f), *infra*.

2/ In Proclamation 4697, dated October 23, 1979, the President, acting under authority of section 404(a) of the Trade Act of 1974 (88 Stat. 1978) amended general headnote 3(f) by deleting "China (any part of which may be under Communist domination or control)" and "Tibet", effective February 1, 1980, the date on which written notices of acceptance were exchanged, following adoption on January 24, 1980 by the Congress of a concurrent resolution of approval extending nondiscriminatory treatment to the products of the People's Republic of China.

1/ Pursuant to section 4(b)(1) of the Taiwan Relations Act (22 U.S.C. 3303(b)(1)) the reference to countries includes Taiwan.

(B)(1) Unless otherwise excluded from eligibility by the provisions of subdivisions (e)(vii)(D) or (e)(vii)(E) of this headnote, any article which is the growth, product, or manufacture of a beneficiary country shall be eligible for duty-free treatment if that article is provided for in an item for which a rate of duty appears in the "Special" column followed by the symbols "E" or "E*" in parentheses, and if--

(i) that article is imported directly from a beneficiary country into the customs territory of the United States; and

(ii) the sum of (A) the cost or value of the materials produced in a beneficiary country or two or more beneficiary countries, plus (B) the direct costs of processing operations performed in a beneficiary country or countries is not less than 35 per centum of the appraised value of such article at the time it is entered. For purposes of determining the percentage referred to in (ii)(B) above, the term "beneficiary country" includes the Commonwealth of Puerto Rico and the United States Virgin Islands. If the cost or value of materials produced in the customs territory of the United States (other than the Commonwealth of Puerto Rico) is included with respect to an article to which subdivision (e)(vii) of this headnote applies, an amount not to exceed 15 per centum of the appraised value of the article at the time it is entered that is attributed to such United States cost or value may be applied toward determining the percentage referred to in (ii)(B) above.

(2) Pursuant to subsection 213(a)(2) of the CBERA, the Secretary of the Treasury shall prescribe such regulations as may be necessary to carry out subdivision (e)(vii) of this headnote including, but not limited to, regulations providing that, in order to be eligible for duty-free treatment under the CBERA, an article must be wholly the growth, product, or manufacture of a beneficiary country, or must be a new or different article of commerce which has been grown, produced, or manufactured in the beneficiary country, and must be stated as such in a declaration by the appropriate party; but no article or material of a beneficiary country shall be eligible for such treatment by virtue of having merely undergone--

(i) simple combining or packaging operations, or

(ii) mere dilution with water or mere dilution with another substance that does not materially alter the characteristics of the article.

(3) As used in subdivision (e)(vii)(B) of this headnote, the phrase "direct costs of processing operations" includes, but is not limited to--

(i) all actual labor costs involved in the growth, production, manufacture, or assembly of the specific merchandise, including fringe benefits, on-the-job training and the cost of engineering, supervisory, quality control, and similar personnel; and

(ii) dies, molds, tooling, and depreciation on machinery and equipment which are allocable to the specific merchandise.

Such phrase does not include costs which are not directly attributable to the merchandise concerned or are not costs of manufacturing the product, such as (i) profit, and (ii) general expenses of doing business which are either not allocable to the specific merchandise or are not related to the growth, production, manufacture, or assembly of the merchandise, such as administrative salaries, casualty and liability insurance, advertising, and salesmen's salaries, commissions or expenses.

(4) Notwithstanding section 311 of the Tariff Act of 1930 (19 U.S.C. 1311), the products of a beneficiary country which are imported directly from such country into Puerto Rico may be entered under bond for processing or manufacturing in Puerto Rico. No duty shall be imposed on the withdrawal from warehouse of the product of such processing or manufacturing if, at the time of such withdrawal, such product meets the requirements of subdivision (e)(vii)(B)(1)(ii) above. ①

(C) Articles provided for in an item for which a rate of duty appears in the "Special" column followed by the symbols "E" or "E*" in parentheses are those proclaimed by the President to be eligible articles for

purposes of the CBERA pursuant to section 213 of that Act. The symbol "E" indicates that all articles provided for in the designated TSUS item are eligible for preferential treatment. The symbol "E*" indicates that some articles provided for in the designated TSUS item are not eligible for preferential treatment, as further described in subdivision (e)(vii)(D) of this headnote. Whenever an eligible article is imported into the customs territory of the United States in accordance with the provisions of subdivision (e)(vii)(B) of this headnote from a country or territory listed in subdivision (e)(vii)(A) of this headnote, it shall be eligible for duty-free treatment as set forth in the "Special" column, unless excluded from such treatment by subdivisions (e)(vii)(D) or (e)(vii)(E) of this headnote.

(D) Articles provided for in an item for which a rate of duty appears in the "Special" column followed by the symbol "E*" in parentheses shall be eligible for the duty-free treatment provided for in subdivision (e)(vii) of this headnote, except--

(1) articles of beef or veal, however provided for in subpart B of part 2 of schedule 1, and sugars, sirups, and molasses, provided for in items 155.20 or 155.30, if a product of the following countries, pursuant to section 213(c) of the CBERA:

Antigua and Barbuda	Saint Lucia
Montserrat	Saint Vincent and the Grenadines
Netherlands Antilles	

(2) sugars, sirups, and molasses, provided for in items 155.20 or 155.30, to the extent that importation and duty-free treatment of such articles are limited by headnote 4, subpart A, part 10, schedule 1, pursuant to section 213(d) of the CBERA;

(3) textile and apparel articles--

(i) in chief value of cotton, wool, man-made fibers, or blends thereof in which those fibers, in the aggregate, exceed in value each other single component fiber thereof; or

(ii) in which either the cotton content or the man-made fiber content equals or exceeds 50 percent by weight of all component fibers thereof; or

(iii) in which the wool content exceeds 17 percent by weight of all component fibers thereof; or

(iv) containing blends of cotton, wool, or man-made fibers, which fibers, in the aggregate, amount to 50 percent or more by weight of all component fibers thereof;

provided, that beneficiary country exports of handloom fabrics of the cottage industry, or hand-made cottage industry products made of such handloom fabrics, or traditional folklore handicraft textiles products, if such products are properly certified under an arrangement established between the United States and such beneficiary country, are eligible for the duty-free treatment provided for in subdivision (e)(vii) of this headnote; or ①

(4) footwear, handbags, luggage, flat goods, work gloves, and leather wearing apparel not designated, at the time of the effective date of the CBERA, as eligible articles for purposes of the GSP. ①

(E) The duty-free treatment provided under the CBERA shall not apply to watches, and watch parts (including cases, bracelets, and straps), of whatever type including, but not limited to, mechanical, quartz digital, or quartz analog, if such watches or watch parts contain any material which is the product of any country with respect to which column 2 rates of duty apply.

(viii) United States-Israel Free Trade Area Implementation Act of 1985.

(A) The products of Israel described in Annex 1 of the Agreement on the Establishment of a Free Trade Area between the Government of the United States of America and the Government of Israel, entered into on April 22, 1985, are subject to duty as provided herein.

Products of Israel, as defined in subdivision (e)(viii) (B) of this headnote, imported into the customs territory of the United States and entered under an item for which a rate of duty appears in the "Special" column followed by the symbol "I" in parentheses are eligible for tariff treatment, as set forth in the "Special" column, in accordance with Section 4(a) of the United States-Israel Free Trade Area Implementation Act of 1985 (99 Stat. 82).

(B) For purposes of subdivision (e)(viii) of this headnote, articles imported into the customs territory of the United States are eligible for treatment as "products of Israel" only if--

(1) that article is the growth, product, or manufacture of Israel or is a new or different article of commerce that has been grown, produced, or manufactured in Israel;

(2) that article is imported directly from Israel into the customs territory of the United States; and

(3) the sum of--

(i) the cost or value of the materials produced in Israel, plus

(ii) the direct costs of processing operations performed in Israel, is not less than 35 percent of the appraised value of such article at the time it is entered.

If the cost or value of materials produced in the customs territory of the United States is included with respect to an article to which subdivision (e)(viii) of this headnote applies, an amount not to exceed 15 percent of the appraised value of the article at the time it is entered that is attributable to such United States cost or value may be applied toward determining the percentage referred to in subdivision (e)(viii)(B)(3) of this headnote.

(C) No article may be considered to meet the requirements of subdivision (e)(viii)(B)(1) of this headnote by virtue of having merely undergone--

(1) simple combining or packaging operations; or

(2) mere dilution with water or mere dilution with another substance that does not materially alter the characteristics of the article.

(D) As used in subdivision (e)(viii) of this headnote, the phrase "direct costs of processing operations" includes, but is not limited to--

(1) all actual labor costs involved in the growth, production, manufacture, or assembly of the specific merchandise, including fringe benefits, on-the-job training and the cost of engineering, supervisory, quality control, and similar personnel; and

(2) dies, molds, tooling, and depreciation on machinery and equipment which are allocable to the specific merchandise.

Such phrase does not include costs which are not directly attributable to the merchandise concerned, or are not costs of manufacturing the product, such as (i) profit, and (ii) general expenses of doing business which are either not allocable to the specific merchandise or are not related to the growth, production, manufacture, or assembly of the merchandise, such as administrative salaries, casualty and liability insurance, advertising, and salesmen's salaries, commissions or expenses.

(E) The Secretary of the Treasury, after consultation with the United States Trade Representative, shall prescribe such regulations as may be necessary to carry out subdivision (e)(viii) of this headnote.

(f) Products of All Other Countries. Products of all countries not previously mentioned in this headnote imported into the customs territory of the United States are subject to the rates of duty set forth in column numbered 1 of the schedules.

4. Modification or Amendment of Rates of Duty. Except as otherwise provided in general headnote 3(e) or in the Appendix to the Tariff Schedules --

(a) a statutory rate of duty supersedes and terminates the existing rates of duty in both column numbered 1 and column numbered 2 unless otherwise specified in the amending statute;

(b) a rate of duty proclaimed pursuant to a concession granted in a trade agreement shall be reflected in column numbered 1 and, if higher than the then existing rate in column numbered 2, also in the latter column, and shall supersede but not terminate the then existing rate (or rates) in such column (or columns);

(c) a rate of duty proclaimed pursuant to section 336 of the Tariff Act of 1930 shall be reflected in both column numbered 1 and column numbered 2 and shall supersede but not terminate the then existing rates in such columns; and

(d) whenever a proclaimed rate is terminated or suspended, the rate shall revert, unless otherwise provided, to the next intervening proclaimed rate previously superseded but not terminated or, if none, to the statutory rate.

5. Intangibles. For the purposes of headnote 1 --

(a) corpses, together with their coffins and accompanying flowers,

(b) currency (metal or paper) in current circulation in any country and imported for monetary purposes,

(c) electricity,

(d) securities and similar evidences of value,

(e) records, diagrams, and other data with regard to any business, engineering, or exploration operation whether on paper, cards, photographs, blueprints, tapes, or other media; and

(f) articles returned from space within the purview of section 484a of the Tariff Act of 1930; and

(g) vessels which are not "yachts or pleasure boats" within the purview of subpart D, part 6, of schedule 6, are not articles subject to the provisions of these schedules.

6. Containers or Holders for Imported Merchandise.

For the purposes of the tariff schedules, containers or holders are subject to tariff treatment as follows:

(a) Imported Empty: Containers or holders if imported empty are subject to tariff treatment as imported articles and as such are subject to duty unless they are within the purview of a provision which specifically exempts them from duty.

(b) Not Imported Empty: Containers or holders if imported containing or holding articles are subject to tariff treatment as follows:

(i) The usual or ordinary types of shipping or transportation containers or holders, if not designed for, or capable of, reuse, and containers of usual types ordinarily sold at retail with their contents, are not subject to treatment as imported articles. Their cost, however, is, under section 402 of the tariff act, a part of the value of their contents and if their contents are subject to an ad valorem rate of duty such containers or holders are, in effect, dutiable at the same rate as their contents, except that their cost is deductible from dutiable value upon submission of satisfactory proof that they are products of the United States which are being returned without having been advanced in value or improved in condition by any means while abroad.

(ii) The usual or ordinary types of shipping or transportation containers or holders, if designed for, or capable of, reuse, are subject to treatment as imported articles separate and distinct from their contents. Such holders or containers are not part of the dutiable value of their contents and are separately subject to duty upon each and every importation into the customs territory of the United States unless within the scope of a provision specifically exempting them from duty.

GENERAL HEADNOTES AND RULES OF INTERPRETATION

(iii) In the absence of context which requires otherwise, all other containers or holders are subject to the same treatment as specified in (ii) above for usual or ordinary types of shipping or transportation containers or holders designed for, or capable of, reuse.

7. Commingling of Articles. (a) Whenever articles subject to different rates of duty are so packed together or mingled that the quantity or value of each class of articles cannot be readily ascertained by customs officers (without physical segregation of the shipment or the contents of any entire package thereof), by one or more of the following means:

- (i) sampling,
 - (ii) verification of packing lists or other documents filed at the time of entry, or
 - (iii) evidence showing performance of commercial settlement tests generally accepted in the trade and filed in such time and manner as may be prescribed by regulations of the Secretary of the Treasury,
- the commingled articles shall be subject to the highest rate of duty applicable to any part thereof unless the consignee or his agent segregates the articles pursuant to subdivision (b) hereof.

(b) Every segregation of articles made pursuant to this headnote shall be accomplished by the consignee or his agent at the risk and expense of the consignee within 30 days (unless the Secretary authorizes in writing a longer time) after the date of personal delivery or mailing, by such employee as the Secretary of the Treasury shall designate, of written notice to the consignee that the articles are commingled and that the quantity or value of each class of articles cannot be readily ascertained by customs officers. Every such segregation shall be accomplished under customs supervision, and the compensation and expenses of the supervising customs officers shall be reimbursed to the Government by the consignee under such regulations as the Secretary of the Treasury may prescribe.

(c) The foregoing provisions of this headnote do not apply with respect to any part of a shipment if the consignee or his agent furnishes, in such time and manner as may be prescribed by regulations of the Secretary of the Treasury, satisfactory proof --

- (i) that such part (A) is commercially negligible, (B) is not capable of segregation without excessive cost, and (C) will not be segregated prior to its use in a manufacturing process or otherwise, and

- (ii) that the commingling was not intended to avoid the payment of lawful duties.

Any article with respect to which such proof is furnished shall be considered for all customs purposes as a part of the article, subject to the next lower rate of duty, with which it is commingled.

(d) The foregoing provisions of this headnote do not apply with respect to any shipment if the consignee or his agent shall furnish, in such time and manner as may be prescribed by regulations of the Secretary of the Treasury, satisfactory proof --

- (i) that the value of the commingled articles is less than the aggregate value would be if the shipment were segregated;

- (ii) that the shipment is not capable of segregation without excessive cost and will not be segregated prior to its use in a manufacturing process or otherwise; and

- (iii) that the commingling was not intended to avoid the payment of lawful duties.

Any merchandise with respect to which such proof is furnished shall be considered for all customs purposes to be dutiable at the rate applicable to the material present in greater quantity than any other material.

(e) The provisions of this headnote shall apply only in cases where the schedules do not expressly provide a particular tariff treatment for commingled articles.

(b) the term "entered for consumption" does not include withdrawals from warehouse for consumption;

(c) the term "withdrawn for consumption" means withdrawn from warehouse for consumption and does not include articles entered for consumption;

(d) the term "rate of duty" includes a free rate of duty; rates of duty proclaimed by the President shall be referred to as "proclaimed" rates of duty; rates of duty enacted by the Congress shall be referred to as "statutory" rates of duty; and the rates of duty in column numbered 2 at the time the schedules become effective shall be referred to as "original statutory" rates of duty;

(e) the term "ton" means 2,240 pounds, and the term "short ton" means 2,000 pounds;

(f) the terms "of", "wholly of", "almost wholly of", "in part of" and "containing", when used between the description of an article and a material (e.g., "furniture of wood", "woven fabrics, wholly of cotton", etc.), have the following meanings:

(i) "of" means that the article is wholly or in chief value of the named material;

(ii) "wholly of" means that the article is, except for negligible or insignificant quantities of some other material or materials, composed completely of the named material;

(iii) "almost wholly of" means that the essential character of the article is imparted by the named material, notwithstanding the fact that significant quantities of some other material or materials may be present; and

(iv) "in part of" or "containing" mean that the article contains a significant quantity of the named material.

With regard to the application of the quantitative concepts specified in subparagraphs (ii) and (iv) above, it is intended that the de minimis rule apply.

10. General Interpretative Rules. For the purposes of these schedules --

(a) the general, schedule, part, and subpart headnotes, and the provisions describing the classes of imported articles and specifying the rates of duty or other import restrictions to be imposed thereon are subject to the rules of interpretation set forth herein and to such other rules of statutory interpretation, not inconsistent therewith, as have been or may be developed under administrative or judicial rulings;

TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1987)

GENERAL HEADNOTES AND RULES OF INTERPRETATION

Page 11 ①

(b) the titles of the various schedules, parts, and subparts and the footnotes therein are intended for convenience in reference only and have no legal or interpretative significance;

(c) an imported article which is described in two or more provisions of the schedules is classifiable in the provision which most specifically describes it; but, in applying this rule of interpretation, the following considerations shall govern:

(i) a superior heading cannot be enlarged by inferior headings indented under it but can be limited thereby;

(ii) comparisons are to be made only between provisions of coordinate or equal status, i.e., between the primary or main superior headings of the schedules or between coordinate inferior headings which are subordinate to the same superior heading;

(d) if two or more tariff descriptions are equally applicable to an article, such article shall be subject to duty under the description for which the original statutory rate is highest, and, should the highest original statutory rate be applicable to two or more of such descriptions, the article shall be subject to duty under that one of such descriptions which first appears in the schedules;

(e) in the absence of special language or context which otherwise requires --

(i) a tariff classification controlled by use (other than actual use) is to be determined in accordance with the use in the United States at, or immediately prior to, the date of importation, of articles of that class or kind to which the imported articles belong, and the controlling use is the chief use, i.e., the use which exceeds all other uses (if any) combined;

(ii) a tariff classification controlled by the actual use to which an imported article is put in the United States is satisfied only if such use is intended at the time of importation, the article is so used, and proof thereof is furnished within 3 years after the date the article is entered;

(f) an article is in chief value of a material if such material exceeds in value each other single component material of the article;

(g) a headnote provision which enumerates articles not included in a schedule, part, or subpart is not necessarily exhaustive, and the absence of a particular article from such headnote provision shall not be given weight in determining the relative specificity of competing provisions which describe such article;

(h) unless the context requires otherwise, a tariff description for an article covers such article, whether assembled or not assembled, and whether finished or not finished;

(i) a provision for "parts" of an article covers a product solely or chiefly used as a part of such article, but does not prevail over a specific provision for such part.

11. Issuance of Rules and Regulations. The Secretary of the Treasury is hereby authorized to issue rules and regulations governing the admission of articles under the provisions of the schedules. The allowance of an importer's claim for classification, under any of the provisions of the schedules which provide for total or partial relief from duty or other import restrictions on the basis of facts which are not determinable from an examination of the article itself in its condition as imported, is dependent upon his complying with any rules or regulations which may be issued pursuant to this headnote.

12. The Secretary of the Treasury is authorized to prescribe methods of analyzing, testing, sampling, weighing, gauging, measuring, or other methods of ascertainment whenever he finds that such methods are necessary to determine the physical, chemical, or other properties or characteristics of articles for purposes of any law administered by the Customs Service.

General statistical headnotes:

1. Statistical Requirements for Imported Articles.

(a) Persons making customs entry or withdrawal of articles imported into the customs territory of the United States shall complete the entry summary or with-

drawal forms, as provided herein and in regulations issued pursuant to law, to provide for statistical purposes information as follows:

(i) the number of the Customs district and of the port where the articles are being entered for consumption or warehouse, as shown in Statistical Annex A of these schedules;

(ii) the name and flag of the vessel or the name of the airline, or in the case of shipment by other than vessel or air, the means of transportation by which the articles first arrived in the United States;

(iii) the foreign port of lading;

(iv) the United States port of unloading for vessel and air shipments;

(v) the date of importation;

(vi) the country of origin of the articles expressed in terms of the designation therefor in Statistical Annex B of these schedules;

(vii) the country of exportation expressed in terms of the designation therefor in Statistical Annex B of these schedules;

(viii) the date of exportation;

(ix) a description of the articles in sufficient detail to permit the classification thereof under the proper statistical reporting number in these schedules;

(x) the statistical reporting number under which the articles are classifiable; the symbol "A" placed as a prefix to the statistical reporting number when claiming "Special Duty" treatment for an article under the Generalized System of Preferences; the symbol "E" placed as a prefix to the statistical reporting number when claiming duty-free treatment for an article under the Caribbean Basin Economic Recovery Act (CBERA); the symbol "I" placed as a prefix to the statistical reporting number when claiming special duty treatment for an article under the United States-Israel Free Trade Area Implementation Act.

(xi) gross weight in pounds for the articles covered by each reporting number when imported in vessels or aircraft;

(xii) the net quantity in the units specified herein for the classification involved;

(xiii) the U.S. dollar value in accordance with the definition of section 402 of the Tariff Act of 1930, as amended, for all merchandise including that free of duty or dutiable at specific rates;

(xiv) the aggregate cost (not including U.S. import duty, if any), in U.S. dollars, of freight, insurance, and all other charges, costs, and expenses (each of which charges, costs, and expenses shall be separately itemized on or attached to the related invoice) incurred in bringing the merchandise from alongside the carrier at the port of exportation in the country of exportation and placing it alongside the carrier at the first U.S. port of entry (in the case of overland shipments originating in Canada or Mexico, such costs, if any, shall not be reported); and

(xv) such other information with respect to the imported articles as is provided for elsewhere in these schedules.

(b) For the purpose of paragraph (a), the following provisions shall govern:

(i) the country of exportation shall be the country of origin except when the merchandise while located in a third country is the subject of a new purchase in which event the third country shall be regarded and reported as the country of exportation, and the date of exportation from the third country shall be regarded and reported as the date of exportation;

(ii) the value of imported merchandise contemplated by subparagraph (xv) of paragraph (a) shall be, to the extent practicable, a value derived from the value of such merchandise as generally determined under section 402 of the tariff act, as the case may be;

(iii) a related-parties transaction shall be a transaction between persons who are related in any respect specified in section 402(g)(1) of the tariff act;

(iv) an arm's-length value shall be a transaction value between a buyer and seller independent

of each other, i.e., persons who are not related in any respect specified in section 402(g)(1) of the tariff act; and

(v) in the event that information for the purposes of subparagraphs (xiv) and (xv) of paragraph ① (a) cannot be readily obtained, the person making the entry or withdrawal shall provide reasonable estimates of such information. The acceptance of an estimate for a particular transaction does not necessarily relieve the person making the entry or withdrawal from obtaining the necessary information for similar future transactions.

2. Statistical Annotations. (a) The statistical annotations to the Tariff Schedules of the United States consist of --

(i) the 2-digit statistical suffixes and any article descriptions applicable thereto,

(ii) the indicated units of quantity, and

(iii) the statistical headnotes and annexes.

(b) The legal text of the Tariff Schedules of the United States consists of the remaining text as more specifically identified in headnote 10(a) of the general headnotes and rules of interpretation.

(c) The statistical annotations are subordinate to the provisions of the legal text and cannot change their scope.

3. Statistical Reporting Number. (a) General Rule: Except as provided in paragraph (b) of this headnote, and in the absence of specific instructions to the contrary elsewhere, the statistical reporting number for an article consists of the 7-digit number formed by combining the 5-digit item number with the appropriate 2-digit statistical suffix. Thus, the statistical reporting number for live monkeys dutiable under item 100.95 is "100.9520".

(b) Wherever in the tariff schedules an article is classifiable under a provision which derives its rate of duty from a different provision, the statistical reporting number is, in the absence of specific instructions to the contrary elsewhere, the 7-digit number for the basic provision followed by the item number of the provision from which the rate is derived. Thus, the statistical reporting number of mixed apple and grape juices, not containing over 1.0 percent of ethyl alcohol by volume, is "165.6500-165.40".

		<p>(e) The U.S. Trade Representative or his designee, after consultation with the Department of Agriculture and the Department of State, may modify the allocation provisions of paragraph (c) (including the deletion or addition of any country or area), and may prescribe further rules, limitations or prohibitions on the entry of sugar if he finds that such actions are appropriate to carry out the obligations of the United States under the International Sugar Agreement, 1977, or any successor agreement thereto, and that such actions give due consideration to the interests in the United States sugar market of domestic producers and materially affected contracting parties to the General Agreement on Tariffs and Trade. If the U.S. Trade Representative takes any such action, he shall so inform the Secretary of the Treasury and the Secretary of Agriculture and shall publish notice thereof in the <u>Federal Register</u>. Such action shall not become effective until the day following the date of filing of such notice or such later date as may be specified by the U.S. Trade Representative.</p> <p>(f) The Secretary shall, in consultation with the U.S. Trade Representative, the Department of State, and other concerned agencies, review the operation of this headnote prior to September 1 of each year. In making such review, the Secretary shall determine whether the continued operation of paragraphs (b), (c), (d), and (e) of this headnote gives due consideration to the interests in the United States sugar market of domestic producers and materially affected contracting parties to the General Agreement on Tariffs and Trade, and whether the operation of paragraph (g) of this headnote would give due consideration to such interests. The Secretary shall file a notice of such determinations in the <u>Federal Register</u> no later than September 1 of each year. The U.S. Trade Representative or his designee may allocate this quantity among supplying countries or areas, and may prescribe further rules, regulations, limitations or prohibitions on the entry of sugar in accordance with the International Sugar Agreement, 1977, and Public Law 96-236. The U.S. Trade Representative or his designee shall inform the Commissioner of Customs of any such action regarding the importation of sugar, and shall publish notice thereof in the <u>Federal Register</u>.</p> <p>(h) For the purposes of this headnote, the term "<u>raw value</u>" means the equivalent of such articles in terms of ordinary commercial raw sugar testing 96 degrees by the polariscope as determined in accordance with regulations issued by the Secretary of the Treasury. Such regulations may, among other things, provide:</p> <p>(1) for the entry of such articles pending a final determination of polarity; and (2) that positive or negative adjustments for differences in preliminary and final raw values be made in the same or succeeding quota periods. 		<p>PART 12. - BEVERAGES</p> <p><u>Part 12 headnotes:</u></p> <p>1. This part covers only products which are fit for use as beverages or for beverage purposes.</p> <p>2. The standard for determining the proof of brandy and other spirits or liquors of any kind when imported is the same as that which is defined in the laws relating to internal revenue. The Secretary of the Treasury, in his discretion, may authorize the ascertainment of the proof of wines, cordials, or other liquors and fruit juices by distillation or otherwise, when it is impracticable to ascertain such proof by the means prescribed by existing law or regulations.</p> <p>3. The duties prescribed on products covered by this part are in addition to the internal-revenue taxes imposed under existing law or any subsequent Act. The duties imposed on products covered by this part which are subject also to internal-revenue taxes are imposed only on the quantities subject to such taxes; except that, in the case of distilled spirits transferred to the bonded premises of a distilled spirits plant under the provisions of section 5232 of the Internal Revenue Code of 1954, the duties are imposed on the quantity withdrawn from customs custody.</p> <p>4. Provisions for the free entry of certain samples of alcoholic beverages are covered by part 5 of schedule 8.</p> <p>-----</p> <p>Subpart A. - Fruit Juices</p> <p><u>Subpart A headnotes:</u></p> <p>1. The products described in this subpart are covered herein whether or not containing ethyl alcohol, but any such products which are also described in subpart C or D of this part are classifiable in said subpart C or D.</p> <p>2. 		<p>3. For the purposes of this subpart --</p> <p>(a) the term "gallon" in the "Rates of Duty" column of the provisions applicable to fruit juices means gallon of natural unconcentrated juice or gallon of reconstituted juice;</p> <p>(b) the term "reconstituted juice" means the product which can be obtained by mixing the imported concentrate with water in such proportion that the product will have a Brix value equal to that found by the Secretary of the Treasury from time to time to be the average Brix value of like natural unconcentrated juice in the trade and commerce of the United States; and</p> <p>(c) the term "Brix value" means the refractometric sucrose value of the juice, adjusted to compensate for the effect of any added sweetening materials, and thereafter corrected for acid.</p> <p>4. In determining the number of gallons of reconstituted fruit juice which can be obtained from a concentrate, the degree of concentration shall be calculated on a volume basis to the nearest 0.5 degree, as determined by the ratio of the Brix value of the imported concentrated juice to that of the reconstituted juice, corrected for differences of specific gravity of the juices. Any juice having a degree of concentration of less than 1.5 (as determined before correction to the nearest 0.5 degree) shall be regarded as a natural unconcentrated juice.</p> <p>5. Subpart B headnotes:						
1. This subpart covers lumber, wood siding, wood flooring, wood moldings, and certain wood carvings and ornaments, including such products when they have been drilled or treated.						
2. For the purposes of this part, the following terms have the meanings hereby assigned to them:						
(a) <u>Lumber</u> : A product of a sawmill or sawmill and planing mill derived from a log by lengthwise sawing which, in its original sawed condition, has at least 2 approximately parallel flat longitudinal sawed surfaces, and which may be rough, dressed, or worked, as set forth below:						
(i) <u>rough lumber</u> is lumber just as it comes from the saw, whether in the original sawed size or edged, resawn, crosscut, or trimmed to smaller sizes;						
(ii) <u>dressed lumber</u> is lumber which has been dressed or surfaced by planing on at least one edge or face; and						
(iii) <u>worked lumber</u> is lumber which has been matched (provided with a tongued-and-grooved joint at the edges or ends), shiplapped (provided with a rabbeted or lapped joint at the edges), or patterned (shaped at the edges or on the faces to a patterned or molded form) on a matching machine, sticker, or molder.						
Edge-glued or end-glued wood over 6 feet in length and not over 15 inches in width shall be classified as lumber if such wood as a solid piece without glue joints would be deemed to be lumber as defined above.

2. For the purposes of the tariff schedules --
 - (a) the term "textile materials" means --
 - (i) the fibers (cotton, other vegetable fibers, wool and hair, silk, and man-made fibers) provided for in part 1 of this schedule;

Page 3-3

Schedule 3 headnotes (con.):

3. For the purposes of the tariff schedules --
- (a) the term "ornamented", as used with reference to textile fabrics and other articles of textile materials, means fabrics and other articles of textile materials which are ornamented with --
- (i) fibers, filaments (including tinsel wire and lame), yarns, or cordage, any of the foregoing introduced as needlework or otherwise, including --
- (A) embroidery, and pile or tufting, whether wholly cut, partly cut, or not cut, and
- (B) other types of ornamentation,
- but not including functional stitching or one row of straight hemstitching adjoining a hem;
- (ii) burnt-out lace;
- (iii) lace, netting, braid, fringe, edging, tucking, or trimming, or textile fabric;
- (iv) applique and repique work, beads, bugles, spangles, bullions, or ornaments; or
- (v) any combination of the foregoing types or methods of ornamentation;
- (b) ornamentation of the types or methods covered hereby consists of ornamenting work done to a pre-existing textile fabric, whether the ornamentation was applied to such fabric --
- (i) when it was in the piece,
- (ii) after it had been made or cut to a size for particular furnishings, wearing apparel, or other article, or
- (iii) after it had actually been incorporated into another article,
- and if such textile fabric remains visible, at least in significant part, after ornamentation: Provided, That lace, netting, braid, fringe, edging, tucking, trimming or ornament shall not be required to have had a separate existence from the fabric or other article on which it appears in order to constitute ornamentation for the purposes of this headnote; and
- (c) applique work, beads, bugles, spangles, bullions, and other forms of nontextile ornamentation applied to a textile fabric or other article of textile materials shall be disregarded in determining the component material of chief value of such fabric or other article.
4. For the purposes of the tariff schedules --
- (a) Except as specifically provided otherwise, in determining the yarn count of fabrics, the warp and filling yarns, whether plied or not, shall be counted as they occur in the fabric.
- (b) In determining the component fibers of chief value in coated or filled, or laminated, fabrics and articles wholly or in part thereof, the coating or filling, or the nontextile laminating substances, shall be disregarded in the absence of context to the contrary.
5. (a) Except as otherwise provided in subsection (b) of this headnote, for the purposes of parts 5, 6, and 7 of this schedule and parts 1 (except subpart A), 4, and 12 of schedule 7, in determining the classification of any article which is wholly or in part of a fabric coated or filled, or laminated, with nontransparent rubber or plastics (which fabric is provided for in part 4C of this schedule), the fabric shall be regarded not as a textile material but as being wholly of rubber or plastics to the extent that (as used in the article) the nontransparent rubber or plastics forms either the outer surface of such article or the only exposed surface of such fabric.
- (b) Any fabric described in part 4C of this schedule shall be classified under part 4C whether or not also described elsewhere in the schedules.
6. The term "Certified hand-loomed and folklore" as used with respect to products provided for in the tariff schedules, refers to such products as have been certified, in accordance with procedures established by the United States Trade Representative pursuant to international understandings, by an official of a government agency of the country where the products were produced, to have been so made.

7. With respect to fabrics provided for in part 3 (other than fabrics valued over \$2 per pound provided for in item 337.50) and in part 4 of this schedule, provisions for fabrics in chief value of wool shall also apply to fabrics in chief weight of wool (whether or not in chief value of wool). For the purposes of the preceding sentence, a fabric is in chief weight of wool if the weight of the wool component is greater than the weight of each other textile component (i.e., cotton, vegetable fibers except cotton, silk, man-made fibers, or other textile materials) of the fabric.

8. In the case of each item in this schedule and schedule 7 on which the United States has agreed to reduce the rate of duty, pursuant to a trade agreement entered into under section 101 of the Trade Act of 1974 before January 3, 1980, on any cotton, wool, or manmade fiber textile product as defined in the Arrangement Regarding International Trade in Textiles, as extended on December 14, 1977 (the Arrangement), if the Arrangement, or a substitute arrangement, including unilateral import restrictions or bilateral agreements, determined by the President to be suitable, ceases to be in effect with respect to the United States before the total reduction in the rate of duty for such item under sections 101 and 109 of the Trade Act of 1974 has become effective, then the President shall proclaim the rate of duty in rate column numbered 1 for such item existing on January 1, 1975, to be the rate of duty effective, with respect to articles entered, or withdrawn from warehouse, for consumption, within 30 days after such cessation and until the President proclaims the continuation of such reduction under the next sentence. If subsequently the Arrangement, or a substitute arrangement, including unilateral import restrictions or bilateral agreements, determined by the President to be suitable, is in effect with respect to the United States, then the President shall proclaim the continuation of the reduction of such rate of duty pursuant to such trade agreement. For purposes of section 109(c)(2) of the Trade Act of 1974, any time when a rate of duty existing on January 1, 1975, is in effect under this headnote shall be time when part of such reduction is not in effect by reason of legislation of the United States or action thereunder.

9. The term "subject to textile agreements", wherever it appears in this schedule or in schedule 7, refers to textiles and textile articles--

(a) in chief value of vegetable fibers, wool, man-made fibers, or silk, provided, in the case of silk apparel, the silk content is less than 70 percent by weight, in the case of silk textiles and other silk articles the silk content is less than 85 percent by weight, or blends thereof in which those fibers, in the aggregate, exceed in value each other single component thereof; or

(b) in which either the cotton content or the man-made fiber content equals or exceeds 50 percent by weight of all component fibers thereof; or

(c) in which the wool content exceeds 17 percent by weight of all component fibers thereof; or

(d) in which either the silk (except as provided for in (a) above) or the non-cotton vegetable fiber content equals or exceeds 50 percent by weight of all component fibers thereof; or

(e) containing blends of silk (except as provided for in (a) above), vegetable fibers, wool, or amount to 50 percent or more by weight of all component fibers thereof.

10. For the purposes of this schedule and in schedule 7:

(a) the term "Subject to cotton restraints" refers to--

(i) articles in which the cotton component equals or exceeds 50 percent by weight of all component fibers thereof; or

Schedule 3 headnotes (con.)

(ii) articles in which the cotton with wool and/or man-made fibers in the aggregate equal or exceed 50 percent by weight of the component fibers thereof and the cotton component equals or exceeds the weight of each of the total wool and/or total man-made fiber components. ②

(b) The term "Subject to wool restraints" refers to articles in which the wool content exceeds 17 percent by weight of all component fibers and which are not provided for in (a) above. ②

(c) The term "Subject to man-made fiber restraints" refers to articles not meeting the requirements of (a) or (b) above, but qualifying as-- ②

(i) articles in which the man-made fiber components equal or exceed 50 percent by weight of all component fibers thereof; or ②

(ii) articles in which the man-made fibers in combination with cotton and/or wool in the aggregate equal or exceed 50 percent by weight of the component fibers thereof and the man-made fiber component exceeds the weight of the total wool and/or total cotton component. ②

Schedule 3 statistical headnotes:

1. The statistical provisions for textiles include, in addition to the regular statistical annotations, certain annotations essential for the administration of the Arrangement Regarding International Trade in Textiles by the Committee for the Implementation of Textile Agreements.

(a) In order to monitor imports subject to restraints under this arrangement, it is necessary that certain articles containing cotton, wool, or man-made fibers, or combinations thereof, be specifically identified. For example, any article containing 50 percent or more by weight of cotton may be designated as "Subject to cotton restraints". Similarly, articles containing 50 percent or more by weight of man-made fibers may be designated as "Subject to man-made fiber restraints". In addition, certain articles containing over 17 percent by weight of wool are "Subject to wool restraints". Articles containing blends of cotton, wool, or man-made fibers which, in the aggregate, amount to 50 percent or more by weight are also subject to these restraints. Definitions of the foregoing provisions are given in statistical headnote 3 below. (It should not be assumed that all imports required to be reported under any such statistical annotations are actually being controlled at any particular time, but restraints may be applied to articles imported from certain countries, depending on unilateral actions or bilateral agreements developed under the Arrangement.)

(b) Restraints under the Arrangement may not apply to developing-country exports of hand-loomed fabrics of the cottage industry, to handmade products of the cottage industry made of such hand-loomed fabrics, or to traditional folklore handicraft textile products, provided that the foregoing types of products are properly certified under arrangements established between the importing and exporting participating countries. The importer is required to identify such certified products on the entry summary or withdrawal forms by placing the symbol "F" as a prefix to the appropriate 7-digit schedule 3 or schedule 7 item number.

2. Certain articles wholly or in chief value of cotton, wool, or man-made fibers and certain woven fabrics in chief weight of wool which may be restrained under the provisions of this arrangement are adequately identified for monitoring purposes in this schedule and in schedule 7 and, therefore, are not annotated as "Subject to (cotton, man-made fiber, or wool) restraints".

3. Where the specific restraint references appear in this schedule and in schedule 7, the following meanings are hereby assigned to them:

(a) The term "Subject to cotton restraints" refers to--

(i) articles in which the cotton component equals or exceeds 50 percent by weight of all component fibers thereof; or

(ii) articles in which the cotton with wool and/or man-made fibers in the aggregate equal or exceed 50 percent by weight of the component fibers thereof and the cotton component equals or exceeds the weight of each of the total wool and/or total man-made fiber components.

(b) The term "Subject to wool restraints" refers to articles in which the wool content exceeds 17 percent by weight of all component fibers and which are not provided for in (a) above.

(c) The term "Subject to man-made fiber restraints" refers to articles not meeting the requirements of (a) or (b) above, but qualifying as--

(i) articles in which the man-made fiber components equal or exceed 50 percent by weight of all component fibers thereof; or

(ii) articles in which the man-made fibers in combination with cotton and/or wool in the aggregate equal or exceed 50 percent by weight of the component fibers thereof and the man-made fiber component exceeds the weight of the total wool and/or total cotton component.

4. The unit of measure to be used by Customs field offices when reporting imports of textiles to Customs Headquarters Quota Section shall be the first unit of quantity unless the second unit of quantity (if there is one) is underlined, in which case the second unit of quantity shall be reported (except item 363.7000 for which the unit of measure shall be "sq. yd.").

5. As a convenient cross-reference, each of the cotton, wool, and man-made fiber categories (or groupings) used by the United States in monitoring import shipments of these textile products and to administer the United States textile trade agreements programs is listed in this schedule and in schedule 7 following the appropriate 7-digit description. Also, for those desiring a cross-reference of applicable 7-digit provisions for each of the category numbers, the following table may be used--

It is noted that beginning in 1985 numerous changes have been made to certain definitions of fabrics and in the statistical reporting requirements. The cross reference has been modified to take those changes into account.

		<p>PART 1. - TEXTILE FIBERS AND WASTES; YARNS AND THREADS</p> <p><u>Part 1 headnotes:</u></p> <p>1. For the purposes of this part -- (a) the term "<u>waste</u>" means all fiber, yarn, and thread wastes, including wastes obtained in the production of continuous and noncontinuous fibers, yarns, and threads, such as gin motes, scutcher waste (including tow), picker waste, card waste, top waste, comber waste (including noils), hackling waste (including tow), sliver waste, roving waste, ring waste, throwster (twister or pleyer) waste, fly, sweepings, and willowed wastes, and including fiber, yarn, and thread wastes obtained in the production of other textile products (i.e., products other than fibers, yarns, or threads) or otherwise obtained; and (b) the term "<u>advanced waste</u>" means any of the above-mentioned wastes which have been cleaned, bleached, colored, or otherwise advanced, and includes fibers recovered by cleaning (except willowing), degumming, carbonizing, cutting, pickering, garnetting or similar processes from any of the above-mentioned wastes or from textile clippings or articles, new or used, whether or not such fibers or the wastes from which recovered have also been otherwise advanced, but does not include fibers which have been carded, combed, or similarly processed, or reuseable yarns or threads.</p> <p>2. Rags and scrap cordage are covered in part 7C of this schedule.</p> <p>-----</p> <p>Subpart A. - Cotton</p> <p><u>Subpart A headnotes:</u></p> <p>1. The term "<u>number</u>", as applied to yarns in this subpart, means the number of 840-yard hanks of yarn in 1 pound. To determine the number of any yarn, whether single or plied, the actual yards per pound shall be divided by 840 and the quotient thereof multiplied by the number of plies in such yarn. Fractions in the resulting yarn number shall be disregarded.</p> <p>2. In this subpart, each of the rates of duty provided for yarns, wholly of cotton, not bleached, mercerized, colored, combed or plied (items 301.01 through 301.98, inclusive) is also the "base rate" for yarn of the same number covered by item 302.--. For citation purposes, the two blanks on the end of the latter item number shall be filled in with the last two digits of the item number for the applicable base rate. Thus, "item 302.28" would be the citation for bleached, mercerized, colored, combed, or plied yarns, wholly of cotton, of number 28.</p> <p>3. Under regulations prescribed by the Secretary of the Treasury, the staple length of cotton shall be determined for all customs purposes by application of the Official Cotton Standards of the United States for length of staple, as established by the Secretary of Agriculture and in effect when the determination is to be made.</p> <p>-----</p>

		<p>(b) if prior to such use or transfer for such use there shall have been combined or mixed with such wool or hair any other merchandise, the whole of the combination or mixture shall be regarded as being composed of wool or hair entered under item 306.00, unless the dealer, manufacturer, or processor liable for the payment of the duties shall establish the quantity of bonded wool or hair in such combination or mixture;</p> <p>(c) every dealer, manufacturer, or processor who has given a bond pursuant to the provisions of item 306.00 shall report any transfer or use of merchandise contrary to the terms of his bond, within 30 days after such transfer or use, to the collector of customs in whose district the bond is filed, and for failure to so report such dealer, manufacturer, or processor shall be liable to a penalty (in addition to the duties provided for) equal to the value of the merchandise so transferred or used at the time and place of such transfer or use; and</p> <p>(d) the clean yield of any wool or hair provided for in item 306.04 shall be deemed to be 100 percent, unless the actual clean yield, as defined in headnote 1(c), supra, has been determined by suitable tests, and such use, or transfer for use, occurs not later than 3 years after the date of entry of such wool or hair.</p> <p>6. The Secretary of the Treasury is hereby authorized and directed to prescribe methods and regulations for carrying out the provisions of this schedule relating to the duties on wool or hair. The Secretary of the Treasury is further authorized and directed to procure from the Secretary of Agriculture, and deposit in such customhouses and other places in the United States or elsewhere as he may designate, sets of the Official Standards of the United States for grades of wool. He is further authorized to display, in the customhouses of the United States, or elsewhere, numbered, but not otherwise identified, samples of imported wool or hair, to which are attached data as to clean yield and other pertinent facts, for the information of the trade and of customs officers.</p> <p>7. For the purposes of item 307.66, the term "average fiber diameter" means the sum of the individual fiber diameter measurements divided by the number of fibers measured.</p> <p>8. For the purposes of item 307.70, the term "fancy yarns" means yarns constructed with novelty effects, including such yarns as slub yarns, loop yarns, boucle yarns, thick-and-thin yarns, core yarns, and gimp yarns, all the foregoing whether or not of novelty color effects; the term does not embrace yarns having novelty effects imparted solely from color or from combinations of different colors.</p> <p><u>Subpart C statistical headnote:</u></p> <p>1. For item 306.00, the 2-digit statistical suffix to be used is the same as the 2-digit suffix for the provision which would have been applicable to the wool or hair had it not been entered under item 306.00. Thus, the 2-digit suffix, for a shipment of East Indian wool, in the grease or washed and not sorted, entered under item 306.00, would be "02", i.e., the same as the suffix for such wool had it been entered under item 306.11.</p>

		<p>PART 3. - WOVEN FABRICS</p> <p><u>Part 3 headnote:</u></p> <p>1. This part covers all woven fabrics in the piece, of any width and with or without fast edges, including gauze and leno-woven fabrics, but does not include --</p> <p>(i) any woven fabrics which are specially provided for in the provisions of part 4 of this schedule;</p> <p>(ii) certain wool fabric samples (see part 7A of this schedule); or</p> <p>(iii) woven fabrics in item 748.10 of part 7B of schedule 7.</p> <p>-----</p> <p>Subpart A. - Woven Fabrics, of Cotton</p> <p><u>Subpart A headnotes:</u></p> <p>1. (a) In the ascertainment of the condition of the fabrics or yarns upon which the duties imposed upon cotton fabrics are made to depend, the entire fabric and all parts thereof shall be included.</p> <p>(b) The term "number", as applied to woven fabrics of cotton, means the average yarn number of the yarns contained therein. In computing the average yarn number, the length of the yarn is considered to be equal to the distance covered by it in the fabric in the condition as imported, with all clipped yarn being measured as if continuous, and with the count being taken of the total single yarns in the fabric including the single yarns in any plied yarns. The weight shall be taken after any excessive sizing is removed by boiling or other suitable process. Any one of the following formulas can be used to determine the average yarn number for tariff purposes:</p> <p>$N = \frac{BYT}{840}, \text{ or } \frac{24T}{352}, \text{ or } \frac{2BT}{1052}, \text{ or } \frac{3ST}{70}$</p> <p>when:</p> <p>N is the average yarn number,</p> <p>B is the breadth (width) of the fabric in inches,</p> <p>Y is the yards (linear) of the fabric per pound,</p> <p>T is the total single yarns per square inch,</p> <p>S is the square yards of fabric per pound,</p> <p>Z is the ounces per linear yard of fabric, and</p> <p>Z' is the ounces per square yard of fabric.</p> <p>2. In this subpart, each of the rates of duty provided for fabric, wholly of cotton, not fancy or figured, and not bleached and not colored (items 319.21 through 319.25 and items 320.01 through 320.98, both inclusive) is also the "base rate" for fabrics of the same average yarn number covered by items 319.27 and 319.29, and by items 321.-- through 331.--, inclusive, respectively. For citation purposes, the two blanks on the end of each of the latter item numbers shall</p>

Thus, "item 324.45" would be the citation for woven fabrics, wholly of cotton, of number 45, fancy or figured, and bleached but not colored.</p> <p>3. The term "<u>fancy or figured</u>", as used in this subpart in relation to fabrics, means fabrics which have been woven with 2 or more colors or kinds of filling; with 8 or more harnesses; or with jacquard, lappet, or swivel attachments; or by any combination of these weaving methods.</p> <p>4. With respect only to the fabrics provided for in items 319.21 through 319.25 and 320.01 through 320.98 other than such fabrics which are products of Israel as defined by general headnote 3(e)(viii) (B), none of the ad valorem rates of duty, or the ad valorem parts of the compound rates of duty, shall be less than the equivalent of --</p> <p>(i) 0.17 cent per number per pound in rate column 1 for items 320.01 through 320.98;</p> <p>(ii) 0.22 cent per number per pound in rate column 1 for items 319.21 through 319.25; and</p> <p>(iii) 0.55 cent per number per pound in rate column 2 for items 319.21 through 319.25 and 320.01 through 320.98.</p> <p><u>Subpart A statistical headnotes:</u></p> <p>1. For the purposes of this schedule, the following terms relating to woven fabrics of cotton have the meanings hereby assigned to them. (Headnote 1 to this subpart sets forth the method for determining the <u>average yarn number</u> of the fabric and the conditions for determining the weight of the fabric. Headnote 3 defines the term <u>fancy or figured</u>.) Unless the context otherwise requires, provisions relating to one or more weaves embrace only those fabrics which (excluding selvage) are wholly of the specified weave or weaves, including combinations exclusively thereof.</p> <p>(a) <u>Cheesecloth</u>: Fabrics of plain weave, weighing not more than 5.9 ounces per square yard, consisting of 85 or less warp ends and filling picks per square inch, whether or not napped.</p> <p>(b) <u>Printcloth</u>: Fabrics of plain weave, weighing not more than 5.9 ounces per square yard, of average yarn numbers 26-40 consisting of more than 85 singles yarns per square inch, of square construction, not combed, whether or not of yarns of different colors, whether or not napped.</p> <p>(c) <u>Batistes, lawns, or voiles</u>: Fabrics of plain weave, weighing not more than 5.9 ounces per square yard, consisting of more than 85 warp ends and filling picks per square inch, of square construction, of average yarn number 41 or higher number, whether or not napped.</p> <p>(d) <u>Duck</u>: Fabrics weighing more than 5.9 ounces per square yard, of average yarn number 15 or lower number, whether or not napped, of the following types --</p> <p>(i) of plain weave, of which the warp or filling, or both, consists of multiple or cabled yarns; and</p> <p>(ii) woven as plain weave except that two or more warp ends are woven as one (taped warp), whether or not containing multiple or cabled yarns; this latter type of duck is not to be classified as a plain weave fabric.</p>

		<p>Subpart E. - Woven Fabrics of Man-Made Fibers</p> <p><u>Subpart E statistical headnote:</u></p> <p>1. For the purposes of this schedule, the following terms relating to woven fabrics of man-made fibers have the meanings hereby assigned to them. Statistical note 1(a) sets forth the conditions for determining the weight of the fabric. Unless the context otherwise requires, provisions relating to one or more weaves embrace only those fabrics which (excluding selvage) are wholly of the specified weave or weaves, including combinations exclusively thereof.</p> <p>(a) <u>Average yarn number:</u> In computing the average yarn number, the length of the yarn is considered to be equal to the distance covered by it in the fabric in the condition as imported, with all clipped yarn being measured as if continuous, and with the count being taken of the total single yarns in the fabric including the single yarns in any multiple (folded) or cabled yarns. The entire fabric and all parts thereof shall be included. The weight shall be taken after any excessive sizing is removed by boiling or other suitable process. Any one of the following formulas can be used to determine the average yarn number:</p> $N = \frac{BYT}{840}, \text{ or } \frac{24T}{352}, \text{ or } \frac{2BT}{1052}, \text{ or } \frac{3ST}{70}$ <p>when:</p> <p>N is the average yarn number, B is the breadth (width) of the fabric in inches, Y is the yards (linear) of the fabric per pound, T is the total single yarns per square inch, S is the square yards of fabric per pound, Z is the ounces per linear yard of fabric, and Z' is the ounces per square yard of fabric.</p> <p>Fractions in the resulting <u>average yarn number</u> shall be disregarded.</p> <p>(b) <u>Not combed or woolens:</u> Fabrics in part of uncombed cotton or wool fibers.</p> <p>(c) <u>Combed or worsteds:</u> Fabrics containing cotton or wool, or both, in which such fibers are combed.</p> <p>(d) <u>High tenacity yarns:</u> Yarns having a tenacity, expressed in centinewtons per tex (cN/tex), greater than the following:</p> <p>(i) Singles yarns of nylon or polyester 60 cN/tex; (ii) Multiple (folded) or cabled yarns of nylon or polyester, 53 cN/tex; or (iii) Singles or multiple (folded) or cabled yarns of viscose rayon, 27 cN/tex.</p> <p>(e) <u>Flat fabrics:</u> Fabrics not containing yarns twisted more than 12 turns per inch.</p> <p>(f) <u>Textured fabrics:</u> Fabrics containing textured yarns.</p> <p>(g) <u>Unbleached or bleached:</u> Fabrics, not containing yarns of different colors, not dyed or printed, but includes (i) white fabrics and (ii) fabrics that may have been treated with a fugitive dye (which disappears after simple washing with soap), or a colorless dressing.</p>

		<p>(p) <u>Batistes, lawns, or voiles</u>: Fabrics of plain weave, weighing not more than 5 ounces per square yard, consisting of more than 85 warp ends and filling picks per square inch, of square construction, of average yarn number 41 or higher number, whether or not napped.</p> <p>(q) <u>Sateens or twills</u>:</p> <p>(i) <u>Twill</u>: Fabrics woven with a twill weave, whether or not napped; that is, fabrics in which the warp and filling yarns are interlaced in such a manner as to produce a diagonal or bias effect on the face of the fabric.</p> <p>(ii) <u>3-Thread or 4-thread twill</u>: Twill fabrics in which the movement (up and down) of the warp ends, in relation to the filling picks, is described as follows: 2 up, 1 down; 1 up, 2 down; 3 up, 1 down; 1 up, 3 down; or 2 up, 2 down. The foregoing is intended to address right-hand twill, left-hand twill, and broken twill.</p> <p>(iii) <u>Broken twill</u>: Fabrics of twill weave which include both right-hand diagonal or twill lines and left-hand diagonal or twill lines.</p> <p>(iv) <u>Cross twill</u>: Twill fabrics in which the warp ends and filling picks comprise equal proportions of the float on the face of the fabric. In this regard, these fabrics may also be known as even-sided twill or balanced twill.</p> <p>(v) <u>Sateens</u>: Fabrics woven with a satin weave, whether or not napped, in which the surface of the cloth consists almost entirely of warp or filling floats; that is, in the repeat of a weave pattern, each yarn of one system passes over several yarns of the other system before interlacing. They are sometimes woven with a twill weave but the diagonal effect in these is not ordinarily discernible on the face of the cloth.</p> <p>(r) <u>Oxford cloth</u>: Fabrics weighing not more than 5 ounces per square yard, whether or not napped, woven as plain weave except that two or more warp ends are woven as one (taped warp). Oxford cloth is not to be classified as a plain weave fabric.</p> <p>(s) <u>Duck</u>: Fabrics weighing more than 5 ounces per square yard, of average yarn number 15 or lower number, whether or not napped, of the following types:</p> <p>(i) Fabrics of plain weave, of which the warp or filling, or both, consists of multiple (folded) or cabled yarns; and</p> <p>(ii) Fabrics woven as plain weave except that two or more warp ends are woven as one (taped warp), whether or not containing multiple (folded) or cabled yarns. This latter type of duck is not to be classified as a plain weave fabric.</p> <p>(t) <u>Plain weave</u>: Fabrics in which each yarn of the filling passes alternately over and under successive yarns of the warp and each yarn of the warp passes alternately over and under successive yarns of the filling.</p> <p>(u) <u>Napped</u>: Fabrics with a fuzzy, fibrous surface produced by scratching or pricking the surface so that some of the fibers are raised from the body of the yarn. Napped fabrics are not to be confused with pile fabrics. Outing and canton flannel, moleskin, etc., are typical fabrics with a nap.</p>

Schedule 4 headnotes:

1. This schedule does not include --
 - (i) any of the mineral products provided for in schedule 5;
 - (ii) metal-bearing ores and other metal-bearing materials, provided for in part 1 of schedule 6; or
 - (iii) metals provided for in part 2 of schedule 6.

2. (a) The term "compounds", as used in this schedule, means substances occurring naturally or produced artificially by the reaction of two or more ingredients, each compound --

- (i) consisting of two or more elements,
- (ii) having its own characteristic properties different from those of its elements and from those of other compounds, and
- (iii) always consisting of the same elements united in the same proportions by weight with the same internal arrangement.

The presence of impurities which occur naturally or as an incident to production does not in itself affect the classification of a product as a compound.

(b) The term "compounds", as used in this schedule, includes a solution of a single compound in water, and, in determining the amount of duty on any such compound subject to duty in this schedule at a specific rate, an allowance in weight or volume, as the case may be, shall be made for the water in excess of any water of crystallization which may have been in the compound.

3. (a) The term "mixtures", as used in this schedule, means substances consisting of two or more ingredients (i.e., elements or compounds), whether occurring as such in nature, or whether artificially produced (i.e., brought about by mechanical, physical, or chemical means), which do not bear a fixed ratio to one another and which, however thoroughly commingled, retain their individual chemical properties and are not chemically united. The fact that the ingredients of a product are incapable of separation or have been commingled in definite proportions does not in itself affect the classification of such product as a mixture.

(b) The term "mixtures", as used in this schedule, includes solutions, except solutions defined as compounds in headnote 2(b) of this schedule.

		<p>PART 1. - BENZENOID CHEMICALS AND PRODUCTS</p> <p><u>Part 1 headnotes:</u></p> <p>1. Except as specifically set forth in the headnotes to other parts of this schedule, all products described in this part shall be classified hereunder even if more specifically described elsewhere in this schedule. Any product described in both subparts B and C of this part shall be classified in subpart C.</p> <p>2. For the purposes of this part, the term "<u>modified benzenoid</u>" describes a molecular structure having at least one six-membered heterocyclic ring which contains at least four carbon atoms and having an arrangement of molecular bonds as in the benzene ring or in the quinone ring, but does not include any such molecular structure in which one or more pyrimidine rings are the only modified benzenoid rings present.</p> <p>3. With the exception of the natural products provided for in subpart C, this part does not cover cyclic organic chemical products (such as, but not limited to, tannic, gallic and pyrogalllic acids; estrone, estradiol, and corticosteroids; morphine, ergot, and cinchona alkaloids; rotenone; phenylalanine; tyrosine; epinephrine; and thymols) having a benzenoid, quinoid, or modified benzenoid structure, which are produced from animal or vegetable products in which such structure occurs naturally, unless such cyclic organic chemical products were obtained, derived, or manufactured in part from any product provided for in subpart A, B or C of this part.</p> <p>-----</p> <p>Subpart A. - Organic Chemical Crudes</p> <p>Coal tar, crude (including crude blast-furnace tar, crude oil-gas tar, and crude water-gas tar), and organic chemical products found naturally in coal tar, whether produced or obtained from coal tar or other source:</p>

		<p>Subpart B. - Industrial Organic Chemicals ^{1/}</p> <p><u>Subpart B headnotes:</u></p> <p>1. The provisions of items 402.00 to 406.63, inclusive, in this subpart shall apply not only to the products described therein when obtained, derived, or manufactured in whole or in part from products described in subpart A of this part, but shall also apply to products of like chemical composition having a benzenoid, quinoid, or modified benzenoid structure artificially produced by synthesis, whether or not obtained, derived, or manufactured in whole or in part from products described in said subpart A.</p> <p>2. For the purpose of classification of merchandise provided for under items 402.36 to 406.63, inclusive, the following provisions shall govern:</p> <p>(a) The term "derivatives" refers to only those derivatives which may be obtained by one or more of the following processes: Halogenation, nitration, nitrosation, sulfonation, and is to be understood to include sulfonyl halides.</p> <p>(b) A compound with functional groups described in two or more items under items 402.36 to 406.63, inclusive, is to be classified in the latest applicable item. For example, 4-acetamido-2-aminophenol, which contains three functional groups, will be classified in 405.12 (Amides), rather than in 404.92 to 405.09, inclusive (Aminophenols), or in 404.84 to 404.90, inclusive (Amines), or in 403.51 (Phenols). When applicable, classification should be made in accordance with the following principles:</p> <p>(i) Salts of organic acids (including phenols) with inorganic bases and salts of organic bases with inorganic acids are to be classified under the same superior heading as the organic acid or base; salts of organic acids with organic bases are to be classified either under the superior heading which describes the functional groups present in the free acid or under the one which describes the functional groups present in the free base, whichever is listed later.</p> <p>(ii) Esters of organic acids are to be classified either under the superior heading which describes the functional groups present in the free acid or under the one which describes the functional groups present in the free alcohol or phenol, whichever is listed later.</p> <p>(iii) The above provisions apply also in cases where the component having the functional groups described under the later superior heading is not of benzenoid origin. For example, benzyl acetate is classified under carboxylic acids (404.24 to 404.47, inclusive) rather than under alcohols (403.45).</p>				
		<p>^{1/} Articles exported to the United States prior to July 1, 1980, must be appraised under the valuation standards provided for in sections 402 and 402a of the Tariff Act of 1930 in effect on June 30, 1980, and are subject to classification under the items of the Tariff Schedules in effect on that date.</p>

Part 1. - Benzenoid Chemicals and Products

4 - 1 - C

Item	Stat. Suf- fix	Articles	Units of Quantity	Rates of Duty		
				1	Special	2
		<p>Subpart C. - Finished Organic Chemical Products <u>1/</u></p> <p><u>Subpart C headnotes:</u></p> <p>1. The provisions of this subpart providing for products obtained, derived, or manufactured in whole or in part from products described in subpart A or B of this part shall also apply to products of like chemical composition having a benzenoid, quinoid, or modified benzenoid structure artificially produced by synthesis, whether or not obtained, derived, or manufactured in whole or in part from products described in the said subpart A or B.</p> <p>2. For the purposes of the Tariff Schedules, the term "<u>pesticides</u>" means products, such as insecticides, rodenticides, fungicides, herbicides, fumigants, and seed disinfectants, chiefly used to destroy undesired animal or plant life.</p> <p>3. The term "<u>plastics materials</u>" in items 408.44 to 409.18, inclusive, embraces products formed by the condensation, polymerization, or copolymerization of organic chemicals and to which plasticizers, fillers, colors, or extenders may have been added. The term includes, but is not limited to, phenolic and other tar-acid resins, styrene resins, alkyd and polyester resins based on phthalic anhydride, coumarone-indene resins, urethane, epoxy, toluene sulfonamide, maleic, fumaric, aniline, and polyamide resins, and other synthetic resins. The plastics materials may be in solid, semi-solid, or liquid condition, such as flakes, powders, pellets, granules, solutions, emulsions, and other basic forms not further processed.</p> <p>4. For the purpose of the classification of merchandise provided for under items 408.44 to 409.18, inclusive, the following provisions shall apply:</p> <p>(a) The term "<u>thermoplastic resins</u>" means those materials in unfinished forms which in their final state as finished articles are capable of being repeatedly softened by increase of temperature and hardened by decrease of temperature.</p> <p>(b) The term "<u>thermosetting resins</u>" (or thermosets) means those materials in unfinished forms which in their final state as finished articles are substantially infusible. Thermosetting resins are often liquids at some stage in their manufacture or processing and are cured by heat, catalysis, or other chemical means. After being fully cured, thermosets cannot be resoftened by heat.</p> <p>(c) Copolymers and terpolymers not specially provided for shall be classified as if they consisted entirely of that monomer which is present in the largest amount by weight on a resin content basis (i.e., excluding the weight of plasticizers, liquid diluents, fillers, or other additives). Any polymer consisting of two or more monomers which are present in equal amounts shall be classified as if it consisted entirely of that monomer whose polymer is listed first under the thermoplastic or thermosetting resins, as appropriate.</p> <p><u>1/</u> Articles exported to the United States prior to July 1, 1980, must be appraised under the valuation standards provided for in sections 402 and 402a of the Tariff Act of 1930 in effect on June 30, 1980, and are subject to classification under the items of the Tariff Schedules in effect on that date.</p>

		<p>5. The term "<u>paints and enamel paints</u>" in this subpart covers dispersions of pigments or pigment-like materials with a liquid (vehicle) which are suitable for application to surfaces as a thin layer, and which dry (harden) to an opaque, solid film. The vehicle of paints consists of drying oils or resins which bind the pigment particles together in the film; the vehicle of enamel paints is principally varnish. Paints and enamel paints may also contain thinners, driers, plasticizers, or other agents.</p> <p>6. The term "<u>stains</u>" in this subpart covers liquids containing transparent or semi-transparent pigments, dyes, or chemicals, chiefly used to deepen or otherwise alter the color of wood, but which will not obscure its grain, texture, or markings.</p> <p>7. For the purposes of this subpart -- (a) The term "<u>surface-active agents</u>" means synthetic organic compounds, or mixtures thereof, which function as surface tension modifiers and are chiefly used for any one or combination of the following purposes: as detergents, wetting agents, emulsifiers, dispersants, or foaming agents. (b) The term "<u>synthetic detergents</u>" embraces formulated materials which are used chiefly for household, laundry, and industrial cleaning purposes, and which consist of one or more surface-active agents as the active ingredients in combination with colors, brighteners, perfumes, inert diluents, builders, and extenders such as inorganic salts, polyphosphates, polysilicates or sodium carboxymethyl-cellulose.</p> <p>8. The term "<u>plasticizers</u>" in item 409.34 means substances which may be incorporated into a material (usually a plastic, resin material, or an elastomer) to increase its softness, flexibility, workability, or distensibility.</p> <p>9. The term "<u>drugs</u>" in this subpart means those substances having therapeutic or medicinal properties and chiefly used as medicines or as ingredients in medicines.</p> <p>10. For the purposes of the provisions of this subpart relating to "colors, dyes, stains, and related products" (except products provided for in items 410.36 to 410.44, inclusive) -- (a) the specific duties shall be based on standards of strength which shall be established by the Secretary of the Treasury, and upon all importations of such articles which exceed such standards of strength the specific duty shall be computed on the weight which the article would have if it were diluted to the standard strength, but in no case shall any such articles of whatever strength be subject to a less specific duty than that provided in the respective items of this subpart; (b) it shall be unlawful to import or bring into the United States any such product unless the invoice shall bear a plain, conspicuous, and truly descriptive statement of the identity and percentage, exclusive of diluents, of such product; (c) it shall be unlawful to import or bring into the United States any such product, if the immediate container or the invoice bears a statement, design, or device regarding the product or the ingredients or substances contained therein which is false, fraudulent, or misleading in any particular; and</p>

This subpart does not cover synthetic plastics materials provided for in part 1C of this schedule, but the addition of any product described in part 1 of this schedule to a synthetic plastics material described in this subpart as an antioxidant, color, dispersing agent, emulsifier, extender, filler, pesticide, plasticizer, or stabilizer does not affect the classification of such synthetic plastics material in this subpart.</p> <p>2. The term "synthetic plastics materials", in this subpart, embraces products formed by the condensation, polymerization, or copolymerization of organic chemicals and to which an antioxidant, color, dispersing agent, emulsifier, extender, filler, pesticide, plasticizer, or stabilizer may have been added. These products contain as an essential ingredient an organic substance of high molecular weight; are capable, at some stage during processing into finished articles, of being molded or shaped by flow; and are solid in the finished article. The term includes, but is not limited to, such products derived from esters of acrylic or methacrylic acid; vinyl acetate, vinyl chloride resins, polyvinyl alcohol, acetals, butyral, formal resins, polyvinyl ether and ester resins, and polyvinylidene chloride resins; urea and amino resins; polyethylene, polypropylene, and other polyalkene resins; siloxanes, silicones, and other organo-silicon resins; alkyd, acrylonitrile, allyl, and formaldehyde resins, and cellulosic plastics materials. These synthetic plastics materials may be in solid, semi-solid, or liquid condition such as flakes, powders, pellets, granules, solutions, emulsions, and other basic crude forms not further processed.</p> <p align="center">_____</p> <p><u>Subpart A statistical headnotes:</u></p> <p>1. Thermosetting resins are often liquids at some stage in their manufacturing or processing, and are cured by heat, catalysis, or other chemical means. After being fully cured, thermosets cannot be resoftened by heat.</p> <p>3. (d) in determining which of two or more equally specific provisions for articles "of iron or steel", "of copper", "of aluminum", or "of" other base metals applies to an article containing two or more base metals and wholly or in chief value thereof, the classification shall be made according to the base metal which predominates by weight over each of the other base metals rather than according to the base metal in chief value.

Schedule 6 statistical headnote:

1. When refined or smelted products are withdrawn for exportation from bonded smelting or refining warehouses established under section 312, Tariff Act of 1930, as amended, that part of each such product which entered into a bonded smelting or refining warehouse as metal-bearing material without the payment of duty thereon, must be reported separately on the warehouse withdrawal form (CF 7512) to show the statistical reporting number for the imported metal-bearing material as reported on the warehouse entry form (CF 7502).

For example, a shipment of zinc concentrates to be initially treated at a zinc plant and containing also lead and copper (in excess of 2 percent by weight, as determined by chemical analysis without deductions), and also gold and silver, shall be reported under the following eight reporting numbers:</p> <p>601.6621 (lead content), 601.6622 (zinc content), 601.6623 (copper content), 601.6624 (gold content), 601.6625 (silver content), 602.1021 (dutiable lead content), 602.2022 (dutiable zinc content), and 602.3023 (dutiable copper content);</p> <p>(b) the 7-digit reporting numbers under items 601.39, 601.66, 603.50, 603.55, and 603.65 are not mutually exclusive. The value of the gold or silver content, if any, shall be reported in connection with the appropriate 7-digit number in item 601.39 or 601.66. 		<p style="text-align: center;">PART 2. - METALS, THEIR ALLOYS, AND THEIR BASIC SHAPES AND FORMS</p> <p><u>Part 2 headnotes:</u></p> <p>1. This part covers precious metals and base metals (including such metals when they are chemically pure), their alloys, and their so-called basic shapes and forms, and, in addition, covers metal waste and scrap. Unless the context requires otherwise, the provisions of this part apply to the products described by whatever process made (i.e., whether rolled, forged, drawn, extruded, cast or sintered) and whether or not such products have been subjected to treatments to improve the properties or appearance of the metals or to protect them against rusting, corrosion or other deterioration. These treatments include annealing, tempering, case-hardening and similar heat-treatments or nitriding; descaling, pickling, scraping, scalping and other processes to remove oxidation scale and crust; rough coating with oil, tar, grease, red lead, or other material to prevent rusting; polishing, burnishing, glazing, artificial oxidation, phosphatizing, and other finishing treatments; metallization by cementation, by electroplating, by immersion in a bath of molten metal, or by other means; coating with enamel, paint, lacquer, or other non-metallic substances; and cladding. This part does not include --</p> <ul style="list-style-type: none"> (i) insulated electric conductors (see part 5 of this schedule); (ii) milliners' wire and other wire covered with textile or other nonmetallic material (see part 3B of this schedule); (iii) leaf and foil (see part 3C of this schedule); or (iv) other articles specially provided for elsewhere in the tariff schedules, or parts of articles. <p>2. <u>Alloys.</u> -- (a) For the purposes of the tariff schedules, alloys are defined and classifiable as hereinafter set forth. Alloys are metallic substances consisting of two or more metals, or of one or more metals and one or more non-metals, intimately united, usually by having been fused together and which may or may not have been dissolved in each other when molten; they include sintered mixtures of metal powders and heterogeneous intimate mixtures obtained by fusion, but do not include substances in which the total weight of the metals does not equal or exceed the total weight of the non-metal components.</p>

Subpart C. - Copper						
Subpart C headnotes:						
1. This subpart covers copper, its alloys, and their so-called basic shapes and forms, and in addition covers copper waste and scrap.						
2. For the purposes of the tariff schedules, the following terms have the meanings indicated:						
(a) <u>Alloys of copper</u> : Copper-base alloys or metals in which the copper content is, by weight, less than 99.3 percent, but not less than any other metallic element. For the purposes of this subpart --						
(i) <u>nickel silver</u> is an alloy of copper which contains by weight 5 percent or more of zinc and 5 percent or more of nickel, with or without small quantities of other elements;						
(ii) <u>brass</u> is an alloy of copper (not including nickel silver) in which zinc is the principal alloying element, with or without small quantities of other elements;						
(iii) <u>cupro-nickel</u> is an alloy of copper in which nickel is the principal alloying element and which does not contain by weight over 2 percent of any other single element.						
In the absence of context which requires otherwise, the term " <u>copper</u> ", wherever used in the tariff schedules, includes alloys of copper.

		<p>(b) <u>Master alloys</u>: Alloys of copper with other materials in any proportion, not usefully malleable and commonly used as raw material in the manufacture of other alloys or as de-oxidants, de-sulphurizing agents or for similar uses in the metallurgy of non-ferrous metals. For the purposes of this subpart --</p> <p>(i) <u>manganese copper</u> is a master alloy which contains copper and manganese, in which the manganese content ranges by weight from 5 to 45 percent, with copper the balance; and</p> <p>(ii) <u>phosphor copper</u> is a master alloy which contains phosphorus and copper, in which the phosphorus content ranges by weight from 5 to 16 percent, with copper the balance.</p> <p>3. For the purposes of this subpart, the following terms have the meanings indicated:</p> <p>(a) <u>Bars and plate</u>: Products of solid rectangular cross section over 0.188 inch in thickness, in coils or cut to length, whether or not corrugated or crimped. Bars are not over 12 inches in width and plates are over 12 inches in width.</p> <p>(b) <u>Sheets and strips</u>: Products of solid rectangular cross section not over 0.188 inch but over 0.006 inch in thickness, in coils or cut to length, whether or not corrugated or crimped. Sheets are over 20 inches in width; strips are not over 20 inches in width and do not include flat wire, as defined in (d) below.</p> <p>(c) <u>Rods</u>: Products of round, half-round, quarter-round, oval, half-oval, triangular, pentagonal, hexagonal, octagonal, or decagonal solid cross section, in straight lengths or in coils, and which if in coils are over 0.375 inch in maximum cross-sectional dimension.</p> <p>(d) <u>Wire</u>: A non-tubular product of any cross-sectional configuration, which if flat is in coils or straight lengths, not over 1.25 inches in width, not over 0.188 inch in thickness, and has all surfaces rolled or drawn, and which if not flat is not over 0.375 inch in maximum cross-sectional dimension and is in coils.</p> <p>(e) <u>Angles, shapes, and sections</u>: Products which do not conform completely to the respective definitions set forth in this headnote for bars, plates, sheets, strip, rods, or wire, and do not include any tubular products.</p> <p>4. For the purposes of this subpart, any continuous cast product, whether or not machined or otherwise processed, which is substantially comparable to, and suitable for the same general purposes as, a wrought product provided for in this subpart shall be classified under the same provision and at the same rate as such wrought product, notwithstanding the provisions of headnotes 3(a) and 3(c) of this part.</p>

Subpart D. - Aluminum								
Subpart D headnotes:								
1. This subpart covers aluminum, its alloys, and their so-called basic shapes and forms and also covers aluminum waste and scrap.								
2. <u>Alloys of aluminum</u> : For the purposes of the tariff schedules, alloys of aluminum are metals in which the aluminum content is, by weight, less than 99.0 percent, but not less than any other metallic element. <u>Aluminum silicon</u> is an alloy of aluminum containing not less than 25 percent of silicon. In the absence of context which requires otherwise, the term " <u>aluminum</u> ", wherever used in the tariff schedules, includes alloys of aluminum.								
3. For the purposes of this subpart, the following terms have the meanings indicated:								
(a) <u>Bars</u> : Products of solid rectangular cross section, 0.25 inch or more in thickness and over 0.375 inch but not over 12 inches in width, in coils or cut to length; and products of solid hexagonal or octagonal cross section, 0.375 inch or more in thickness (measuring the perpendicular distance between opposite faces) in coils, or of any thickness in straight lengths.								
(b) <u>Rods</u> : Products of solid round cross section, which, if 0.375 inch or more in diameter, are in coils or cut to length, and which, if under 0.375 inch in diameter, are in straight lengths.								
(c) <u>Plates, sheets, and strips</u> : Products of solid rectangular cross section, in coils or cut to length, whether or not corrugated or crimped. Plates are 0.25 inch or more in thickness and over 12 inches in width; sheets and strip are under 0.25 but not under 0.006 inch in thickness.								
(d) <u>Wire</u> : A product of solid round, rectangular, hexagonal, or octagonal cross section, in coils, whose diameter, width, or perpendicular distance between opposite faces is less than 0.375 inch.								
(e) <u>Angles, shapes, and sections</u> : Products which do not conform completely to the respective definitions set forth in this headnote for bars, plates, sheets, strips, rods, or wire and do not include any tubular products.								
Subpart D statistical headnote:								
1. For purposes of this subpart, the term " <u>beryllium aluminum master alloy</u> " refers to an alloy of aluminum which contains not less than 4 percent of beryllium.

		<p>Part 5. - ELECTRICAL MACHINERY AND EQUIPMENT</p> <p><u>Part 5 headnotes:</u></p> <p>1. This part does not cover --</p> <p>(i) electrical insulators or insulating materials (classifiable in other schedules according to materials of which made);</p> <p>(ii) certain carbons, electrodes, and brushes provided for in part 1E of schedule 5;</p> <p>(iii) ceramic electrical ware (part 2D of schedule 5);</p> <p>(iv) electric blankets and other electrically warmed bedding (see part 5B of schedule 3);</p> <p>(v) washing machines, ironing machines, sewing machines, and other machines provided for in parts 4 or 6 of this schedule; or</p> <p>(vi) electrical instruments and apparatus provided for in schedule 7.</p> <p>2. For the purposes of this part (items 682.05 and 682.07), the rated kva of a transformer is the kilovolt-ampere output on a continuous duty basis at the rated secondary voltage (or amperage, when applicable) and at the rated frequency without exceeding the rated temperature limitations.</p> <p>3. The provisions of this headnote apply to "television apparatus and parts thereof" provided for in items 684.92, 684.98, 685.00, and 685.08 of this part. ①</p> <p>(a) The term "complete", as used to describe television receivers, means a television receiver, fully assembled, whether or not packaged or tested for distribution to the ultimate purchaser.</p> <p>(b) For the purposes of items 684.98 and 685.00--</p> <p>(i) each subassembly that contains as a component, or is covered in the same entry with, one or more of the following television components, viz.,</p> <p>tuner, channel selector assembly, antenna, deflection yoke, degaussing coil, picture tube mounting bracket, grounding assembly, parts necessary for fixing the picture tube or tuner in place, consumer operated controls, or speaker,</p> <p>shall be classified in item 684.98; and</p> <p>(ii) each subassembly shall be counted as a single unit, except that two or more different printed circuit boards or ceramic substrates covered by the same entry and designed for assembly into the same television models shall be counted as one unit.</p> <p>4. For the purposes of this part "transceivers" are combinations of radio transmitting and receiving equipment in a common housing, employing common circuit components for both transmitting and receiving, and which are not capable of simultaneously receiving and transmitting.</p>

		<p>5. For the purposes of the tariff schedules hand-held Citizens Band (CB) radio transceivers are Citizens Band (CB) radio transceivers designed for operation in the hand, having a permanently affixed antenna and an internal microphone, and not designed for use with an external power source.</p> <p>6. For purposes of the tariff schedules, the term "entertainment broadcast band receivers" means those radio receivers designed principally to receive signals in the AM (550-1650 kHz) and FM (88-108 MHz) entertainment broadcast bands, whether or not capable of receiving signals on other bands (e.g., aviation, television, marine, public safety, industrial, and citizens band).</p> <p><u>Part 5 statistical headnotes:</u></p> <p>1. For statistical reporting purposes in this part (item 685.40), "audio machines" are those machines designed specifically for recording, reproducing, or recording and reproducing frequencies in the sound spectrum only.</p> <p>2. For statistical reporting purposes in this part (item 685.40), "video machines" are those designed specifically for recording or recording and reproducing video signals. An audio track may or may not be included on the recording medium.</p> <p>3. For statistical reporting purposes in this part, "stereo" apparatus will be considered to be capable of reproducing two (and no more) discrete audio signals.</p> <p>4. To determine the video display diagonal in items 684.92, 684.96, 685.49, and 687.35, measurements shall be taken of the maximum straight line dimension across that part of the face-plate used for displaying video, and shall be rounded to the nearest inch. Measurements falling exactly on the 1/2 inch shall be rounded to the next larger integer.</p> <p>5. For statistical reporting purposes in this part (item 685.16), the lowest operating frequency will determine the classification.</p> <p>6. For statistical reporting purposes in this part (item 687.74), "memory integrated circuits" are integrated circuits consisting principally of cells capable of storing retrievable data and "micro-processor integrated circuits" are integrated circuits capable of executing a processing program and of storing at least the data necessary for the execution of the program.</p> <p>7. For statistical reporting purposes in this part (item 684.96), the term "incomplete receivers" refers to assemblies other than kits containing all parts necessary for assembly into complete color television receivers, which consist at least of, or are covered in the same entry with, a color picture tube and a printed circuit board or ceramic substrate, with components assembled thereon, designed to perform the intermediate frequency amplification functions or the picture and audio demodulation functions of a color television receiver.</p>

		<p style="text-align: center;">Subpart E. - Watches, Clocks, and Timing Apparatus</p> <p><u>Subpart E headnotes:</u></p> <p>1. This subpart covers watches and clocks, time switches and other timing apparatus with clock or watch movements, and parts of these articles. This subpart, however, does not cover --</p> <ul style="list-style-type: none"> (i) synchronous or subsynchronous motors (see part 5 of schedule 6); (ii) screws, nuts, and bolts (see part 3D of schedule 6); (iii) music boxes and their mechanisms (see part 3 of schedule 7); (iv) combination articles provided for elsewhere in the tariff schedules; or (v) clock and watch glasses and glass domes (see part 3 of schedule 5). <p>2. For the purposes of this subpart --</p> <ul style="list-style-type: none"> (a) the term "watches" embraces timepieces (including timepieces having special features, such as chronographs, calendar watches, stopwatches, and watches designed for use in skindiving) suitable for wearing or carrying on or about the person, whether or not the movement therein is within the definition of "watch movement" in headnote 2(b), below; (b) the term "watch movement" means a timepiece movement measuring less than 1.77 inches in width and less than 0.50 inch in thickness; (c) the term "clock movement" means any movement or mechanism, other than "watch movements" as defined in headnote 2(b), above, intended or suitable for measuring time; (d) the term "cases" embraces inner and outer cases, containers, and housings for movements, together with parts or pieces, such as, but not limited to, rings, feet, posts, bases, and outer frames, and any auxiliary or incidental features, which (with appropriate movements) serve to complete the watches, clocks, time switches, and other apparatus provided for in this subpart; and (e) the term "jewels" includes substitutes for jewels. <p>3. (a) The complete citation for watches covered by item 715.05 and clocks covered by items 715.15 and 715.16 shall be each of such item numbers, followed by the appropriate item numbers for the respective movements and cases comprising such watches or clocks. Thus, item 715.05-716.04-720.20 is the correct citation for a watch in a gold case with a movement having over 17 jewels and valued not over \$15.</p>

		<p>(b) In this subpart, each of the rates of duty provided for watch movements, having no jewels or not over 17 jewels, not adjusted, not self-winding, and not constructed or designed to operate for a period in excess of 47 hours without rewinding (items 716.09 through 716.45, inclusive) is also the "base rate" for watch movements having the same width and number of jewels covered by item 719.--. For citation purposes, the two blanks on the end of such item number shall be filled in with the last two digits of the item number for the applicable base rate. Thus, "item 719.38" would be the citation for a watch movement, 0.7 inch wide, having 17 jewels, which is adjusted or self-winding or constructed or designed to operate for a period in excess of 47 hours without rewinding, and valued not over \$15.</p> <p>(c) The width of a watch or clock movement, as defined in headnote 2(b) and (c) of this subpart, is the shortest surface dimension through the center of the pillar or bottom plate, or its equivalent, not including in the measurement any portion not essential to the functioning of the movement; and the thickness of a "watch movement", as so defined, is the maximum thickness between the outside surfaces of the plate and bridges, or their equivalents.</p> <p>(d) The additional duty for adjustments to watch movements applies to each adjustment of whatever kind (treating adjustment to temperature as two adjustments), in accordance with the marking as hereinafter provided for.</p> <p>(e) Bimetallic balance wheels which are not part of balance assemblies, and mainsprings with riveted ends, are each to be considered as one part or piece, for the purposes of assessing duties on assemblies and subassemblies provided for in items 720.75, 720.80, 720.82, 720.84, and 720.86.</p> <p>4. <u>Special Marking Requirements:</u> Any movement, case, or dial provided for in this subpart, whether imported separately or attached to an article provided for in this subpart, shall not be permitted to be entered unless conspicuously and indelibly marked by cutting, die-sinking, engraving, or stamping, as specified below:</p> <p>(a) Watch movements shall be marked on one or more of the bridges or top plates to show --</p> <p>(i) the name of the country of manufacture,</p> <p>(ii) the name of the manufacturer or purchaser,</p> <p>(iii) in words, the number of jewels, if any, serving a mechanical purpose as frictional bearings; and</p> <p>(iv) in words, the number and classes of adjustments, or, if unadjusted, the word "unadjusted".</p>

In such circumstances, the movement and its dial shall also be subject to the same marking requirements provided for in headnote 4 of this subpart. 		<p>(d) (i) In calendar year 1983 the total quantity of such articles which may be entered free of duty shall not exceed 4,800,000 units.</p> <p>(ii) In subsequent calendar years, the Secretary of Commerce and the Secretary of the Interior (hereinafter referred to as the "Secretaries"), acting jointly, shall establish a limit on the quantity which may be entered free of duty during the calendar year, and shall consider whether such limit is in the best interest of the insular possessions and not inconsistent with domestic or international trade policy considerations. The quantity the Secretaries establish in any calendar year under this paragraph shall not--</p> <p>(I) exceed 10,000,000 units, or one-ninth of apparent domestic consumption (as determined by the International Trade Commission pursuant to paragraph (e) of this headnote), whichever is greater;</p> <p>(II) be decreased by more than 10 percent of the quantity established for the immediately preceding calendar year; and</p> <p>(III) be increased to more than 7,000,000 units, or by more than 20 percent of the quantity established for the immediately preceding calendar year, whichever is greater.</p> <p>(e) On or before April 1 of each calendar year (beginning with the first year in which watch imports from the United States insular possessions exceed 9,000,000 units), the International Trade Commission shall determine the apparent United States consumption of watches and watch movements (including solid state timepieces) during the preceding calendar year, shall report such determination to the Secretaries, and shall publish such determination in the <u>Federal Register</u>.</p> <p>(f) (i) In calendar year 1983, not more than 3,000,000 units of the total quantity of articles described in paragraph (d) which may be entered free of duty shall be the product of the Virgin Islands, not more than 1,200,000 units shall be the product of Guam, and not more than 600,000 units shall be the product of American Samoa.</p> <p>(ii) For calendar year 1984 and thereafter, the Secretaries may establish new territorial shares of the total amount which may be entered free of duty, taking into account the capacity of each territory to produce and ship its assigned amounts. A territory's share in any year shall not be reduced--</p> <p>(I) by more than 200,000 units in calendar year 1984 or 1985, and</p> <p>(II) by more than 500,000 units in calendar year 1986 or thereafter, except that no territorial share shall be established at less than 500,000 units.</p> <p>(g) The Secretaries, acting jointly, shall allocate the calendar year duty exemptions provided by paragraphs (b), (d), and (f) of this headnote on a fair and equitable basis among producers located in the insular possessions, and shall issue appropriate licenses therefor. Allocations made by the Secretaries shall be final. In making the allocations, the Secretaries shall consider the potential impact of territorial production on domestic production of like articles and shall establish allocation criteria (including minimum assembly requirements) that will reasonably maximize the net amount of direct economic benefits to the insular possessions.</p>

		<p>(vii) Any certificate issued under subparagraph (i) shall expire 1 year from the date of issuance and may be applied against duties on imports of watches and watch movements the entry of which were made within 2 years prior to the date of issuance of the certificate.</p> <p>(viii) For purposes of determining the applicable amount of any producer's certificate to be issued during calendar year 1983, the greater of--</p> <p style="padding-left: 40px;">(I) the producer's creditable wages for calendar year 1982, or</p> <p style="padding-left: 40px;">(II) 60 percent of the producer's creditable wages for calendar year 1981, shall be considered the creditable wages for calendar year 1982.</p> <p>(ij) The Secretaries are authorized to issue such regulations, not inconsistent with the provisions of this headnote, as they determine necessary to carry out their respective duties under this headnote. Such regulations shall include minimum assembly requirements. Any duty-free entry determined not to have been made in accordance with applicable regulations shall be subject to the applicable civil remedies and criminal sanctions, and, in addition, the Secretaries may cancel or restrict the license or certificate of any manufacturer found in willful violation of the regulations.</p> <p><u>Subpart E statistical headnote:</u></p> <p>1.(a) The statistical reporting numbers for watches (item 715.05) and for clocks containing movements measuring less than 1.77 inches in width (items 715.15 and 715.16) are a combination of three 7-digit numbers, viz., the 7-digit number for the imported watch (715.0500) or clock (715.1500 or 715.1600), and the 7-digit numbers which would have applied to the movement and to the case if they had been imported separately. Thus, the correct reporting number for a watch with a 15-jewel adjusted or self-winding movement, not over 0.6 inch in width, having a balance wheel and hairspring, and valued not over \$15, and a gold case is "715.0500-719.3735-720.2000".</p> <p>(b) The number and value of imported watches or clocks, and of their movements and cases must be reported separately with their respective 7-digit numbers.</p> <p>(c) The statistical suffixes to be used in the reporting of watch movements classifiable in items 716.37 through 716.40, inclusive, shall be as follows: <u>movements having a balance wheel and hairspring</u> shall have a statistical suffix comprised of the sum of 20 plus the actual number of jewels in the movement; <u>movements not having a balance wheel and hairspring</u> shall have a statistical suffix comprised of the sum of 40 plus the actual number of jewels in the movement. For example, the statistical suffix for a balance wheel and hairspring movement having 12 jewels would be "32"; similarly, a movement not having a balance wheel and hairspring which has 8 jewels, would have a statistical suffix of "48".</p> <p>(d) The statistical suffixes to be used in the reporting of item 719.-- shall be the statistical suffix for the applicable items 716.10 through 716.40, inclusive, from which the "base rate" was derived.</p>
