Preliminary draft

Disaggregate U.S. Labor Statistics for the USAGE 2.0 and GTAP Applied General equilibrium Models¹

Caitlyn Carrico,² Lin Z. Jones,³ and Marinos Tsigas³

25 October 2012

Abstract

This paper documents a methodology to disaggregate by occupation the U.S. sectoral employment data within the USAGE 2.0 and GTAP applied general equilibrium (AGE) models. We utilize statistics from the U.S. Bureau of Labor Statistics and the U.S. Department of Agriculture, in particular the Occupational Employment Statistics Survey and the Census of Agriculture, to produce the following occupation-by-sector tables for 2007 and 2010 for each of the two AGE models: employment, mean annual wage, wage bill, and wage bill shares. The last table, wage bill shares, can be used to split payments to labor services in the AGE models into 22 major occupations.

¹ The views expressed in this paper are those of the authors alone. These views do not necessarily reflect the views of the U.S. International Trade Commission or any of its individual Commissioners.

² Caitlyn Carrico is a doctoral student in the Department of Agricultural Economics, Purdue University, West Lafayette, Indiana, USA. This work was conducted when she was working at the U.S. International Trade Commission.

Disaggregate U.S. Labor Statistics for the USAGE 2.0 and GTAP Applied General Equilibrium Models

1. INTRODUCTION

There is great interest in developing a better understanding of economic impact of trade on U.S. labor markets. Although wage and employment are an integral part of the general equilibrium effects of trade, applied general equilibrium (AGE) models such as USAGE 2.0 and GTAP do not split labor to more than two types: skilled and unskilled labor.

USAGE 2.0 is the second version of the USAGE-ITC applied general equilibrium model, a single region AGE model of the U.S. economy. Documentation and discussion of the USAGE-ITC model may be found in Dixon and Rimmer (2002) and U.S. International Trade Commission (2004 and 2011). The theory of USAGE 2.0 is similar to the theory of the USAGE-ITC model. USAGE 2.0 is based on the time series of annual U.S. input-output data published by the Bureau of Economic Analysis while USAGE-ITC is based on the benchmark U.S. input-output accounts (see <http://www.bea.gov/industry/index.htm>).

GTAP is a multi-regional, global trade applied general equilibrium model. Documentation and discussion of the GTAP model and database can be found in the GTAP web site (<https://www.gtap.agecon.purdue.edu/about/project.asp>) as well as in Hertel (1997), Hertel and Tsigas (1997) and Narayanan, G. B., A. Aguiar and R. McDougall (2012).

This paper documents a methodology to disaggregate labor by occupation and expand the labor data within the current USAGE 2.0 and GTAP models for the U.S. economy, by incorporating data from the U.S. Bureau of Labor Statistic Occupational Employment Statistics Survey, as well as the U.S. Department of Agriculture Census of Agriculture. For each of the two AGE models, we produce the following occupation-by-sector tables for 2007 and 2010: employment, mean annual wage, wage bill, and wage bill shares. The last table, wage bill shares, can be used in the AGE models to disaggregate U.S. labor data into 22 occupations.

2. DATA SOURCES

2.1 BLS-OES

2.1.1 Overview

The Occupational Employment Statistics (OES) Survey is a semi-annual survey of nonfarm business establishments, conducted by the Bureau of Labor Statistics (BLS). It is

designed to measure employment and wages for over 750 occupations at detailed levels of industry classification and geographic area.

The OES survey collects data in twice-a-year panels every three years, resulting in six panels. Each panel includes approximately 200,000 establishments, giving a total of around 1.1 million establishments over the three-year six-panel samples that cover about 70 percent of the employment in the United States. Estimates of occupational employment and wage rate are based on a rolling six-panel (or 3-year) cycle, including employment counts, mean wages, median wages, percentile wages, upper 2/3-lower 1/3 (experienced vs. entry-level) wages, and associated variances. The OES does not include farm business establishments. In 2002, the OES began to use North American Industry Classification System (NAICS) instead of Standard Industrial Classification (SIC) to classify industries.

2.1.2. Key Elements

Key elements of OES are listed below, as modified from the BLS “Survey Methods and Reliability Statement”:

- An **establishment** is generally a single physical location where economic activities occur. Each establishment is assigned a 6-digit NAICS code.
- **Employment** refers to the number of full-time and part-time employees. Self-employed workers, owners and partners in unincorporated firms, household workers, and unpaid family workers are excluded.
- **Occupations** are classified based on work performed and on required skills, and defined by the U.S. Office of Management and Budget's Standard Occupational Classification (SOC) system codes at 2 and 6-digit levels. 2-digit SOC codes designate 23 major occupation groups (Table 1), though OES only uses the 22 groups and exclude the last one, “Military Specific Occupations”. The 2007 OES uses the 2000 SOC system, while the 2010 OES uses the 2010 SOC system. At 2-digit level, the classification for major occupation groups remains unchanged.

Table 1: 2010 Standard Occupational Classifications at 2 digit level (23 Major Groups)

| Index | SOC | SOC Code | Occupations |
|--------------|------------|-----------------|--|
| 1 | 11 | management | Management Occupations |
| 2 | 13 | bus_finance | Business and Financial Operations Occupations |
| 3 | 15 | comp_math | Computer and Mathematical Occupations |
| 4 | 17 | arch_enginr | Architecture and Engineering Occupations |
| 5 | 19 | sciences | Life, Physical and Social Science Occupations |
| 6 | 21 | social_serv | Community and Social Service Occupations |
| 7 | 23 | legal | Legal Occupations |
| 8 | 25 | education | Education, Training and Library Occupations |
| 9 | 27 | entertain | Arts, Design, Entertainment, Sports, and Media Occupations |
| 10 | 29 | health_prac | Healthcare Practitioners and Technical Occupations |
| 11 | 31 | health_sup | Healthcare Support Occupations |
| 12 | 33 | protective | Protective Service Occupations |
| 13 | 35 | food_service | Food Preparation and Serving Related Occupations |
| 14 | 37 | build_maint | Building and Grounds Cleaning and Maintenance |
| 15 | 39 | pers_care | Personal Care and Service Occupations |
| 16 | 41 | sales | Sales and Related Occupations |
| 17 | 43 | admin_supp | Office and Administrative Support Occupations |
| 18 | 45 | farm_occup | Farming, Fishing and Forestry Occupations |
| 19 | 47 | constructn | Construction and Extraction Occupations |
| 20 | 49 | maint_repr | Installation, Maintenance, and Repair Occupations |
| 21 | 51 | production | Production Occupations |
| 22 | 53 | transport | Transportation and Material Moving Occupations |
| 23 | 55 | miltary | Military Specific Occupations |

- A **wage** is money that is paid or received for work or services performed in a specified period. Base rate pay, cost-of-living allowances, guaranteed pay, hazardous-duty pay, incentive pay such as commissions and production bonuses, and tips are included in a wage (U.S. Bureau of Labor Statistics, 2011).
- **Industries** are classified by the North American Industry Classification System (NAICS) codes at 4, 5 and 6-digit levels. However, the data at 5 or 6 -digit level of detail are not available across all sectors and occupations.

-
- 2.1.3. OES Data

The OES survey is primarily a mail survey. Probability sample panels of about 200,000 establishments are selected semianually. Most responses are obtained through mail with the remaining responses collected by telephone, e-mail or other electronic means, or personal visit.

Respondents with more than ten employees are given pre-selected SOC occupation choices based on the establishment's industry classification. Nonetheless, the respondent can always write-in any detailed SOC occupation that is not included. Respondents with ten or less employees are sent a form without any pre-selected occupations. These respondents must write-in all occupations themselves.

BLS estimates employment by the product of reported employment per occupation with a ratio estimator. For the 2007 data, the ratio estimator uses the average of employment totals from November 2006 and May 2007 of the Quarterly Census of Employment and Wages (QCEW) and employment totals of the reporting establishment. By this method, BLS scales the numbers from their samples to be compatible with the QCEW which covers 98 percent of U.S. jobs.

For certain occupations, such as teachers, flight attendants, and pilots, only annual wages are reported if workers are paid by year and do not work the usual 2,080 hours per year. In this case, hourly wages are not calculated using the 2,080 factor. For other occupations, such as entertainment workers, in which workers are paid high hourly wages but do not work full-time year-round, only hourly rates are reported. For these occupations, the annual wage will not be calculated by the 2,080 factor. For our dataset, we only use the annual wages, and thus exclude data of employees for whom only hourly wages are reported.

Although the original BLS OES dataset provides employment and wage estimates within each industry across almost all occupation types, some individual occupational employment and wage estimates are either unavailable or withheld from publication in order to ensure confidentiality. In 2007, at 2-digit SOC level, out of 4820 records, 167 are found missing employment estimates, and 34 are found missing annual wage estimates. In 2010, at 2-digit SOC level, out of 4595 records, 140 are found missing employment estimates, and 31 are found missing annual wage estimates. Here, we treat unavailable and confidential data as missing data, and assign them the value of zero.

2.2 USDA-the Census of Agriculture

Since the OES covers only non-farm business establishments, we use the data from the Census of Agriculture conducted by the Department of Agriculture (USDA) to cover agricultural sectors.

2.2.1. Overview

The Census of Agriculture (the Census) is a census conducted every five years by USDA's National Agricultural Statistical Services (NASS) that provides comprehensive agricultural data for every county in the United States. Only farms that meet the NASS farm definition (an operation that produces or would normally produce and sell \$1,000 or more of agricultural products per year) are included.

Since 1997, the Census has been using the NAICS codes to classify agricultural production establishments with a single principle of aggregation that production units

using similar production processes should be grouped together. Fourteen major NAICS classifications were used in Table 62 “Summary by North American Industry Classification System” in the 2007 census.

The Census covers various aspects of farm establishment, such as land use, output, product sales, government payment, and production expenses. However, for the purpose of labor disaggregation, we only use the data concerning farm operators and hired farm labor.

2.2.2. Key Elements and Data

Farm operator:

- Farm operator is the person who runs the farm, making the day-to-day management decisions. The operator could be an owner, hired manager, cash tenant, share tenant, and/or a partner. The Census collects information for up to three operators per farm. In the case of multiple operators, the respondent for the farm identifies who the principle farm operator is during the data collection process. We categorize farm operators as “SOC11-management occupations”.
- The Census reports number of operators, as well as information on principal operators, such as days worked off farm. In order to produce “year-round, full-time” equivalents, we adjust the employment counts for farm operators by scaling reported time worked on the farm. For instance, for those with the category “1 to 49 days worked off farm”, we use the scaling factor of $[(1+49)/2]/365]$. Because the Census reports “Days worked off farm” for principal operators only, we assume the rest of operators are non-principal operators that spend half of the year at the most working on farm, and we adjust the employment counts with a scaling factor of $[(1+183)/2]/365]$.
- The Census does not report hourly or annual wages of farm operators. Based on the fact that some farm operators are hired managers, we use mean annual wage for “management occupations” reported by the OES for industry sector “support activities for crop production” for crop farm operators, and “support activities for animal production” for livestock farm operators.

Hired farm worker:

- Hired farm worker is any worker, other than an agricultural service worker, who was paid for at least one hour of agricultural work on a farm or ranch. Worker type is determined by what the employee was primarily hired to do, including field workers, livestock workers, supervisors, and other workers (U.S. Department of Agriculture, 2012). We categorize hired farm labor as “SOC45-farming, fishing and forestry occupations”.

- We adjusted the employment counts for hired farm worker by scaling reported time spent working on the farm in order to produce “year-round, full-time” equivalents. For instance, the Census divides hired farm labor into two categories by days worked in farm: 150 days or more, and less than 150 days. For the first category, we use the scaling factor of $[((150+365)/2)/365]$. For the second category, we use the scaling factor of $[((1+149)/2)/365]$.
- We use annual expenditures on hired farm labors and adjusted annual employment counts of hired farm labor to calculate mean annual wage. The expenditures on hired farm labor include cash expenditure, as well as payment of wages to members of the operators’ firmly and social security taxes.

With no sufficient data on employment number as well as working days worked in farms, we omit contract labor in our labor disaggregation, though it is an important component of agricultural labor market.

3. LABOR DISAGGREGATION METHODOLOGY

By using the employment and wage data from the OES survey and the Census of Agriculture, we are able to generate the shares of labor payment for twenty-two major occupations within each AGE model sector for 2007 and 2010, and thus disaggregate labor into 22 occupation groups in AGE models.

The methodology of labor disaggregation is detailed step-by-step below:

Step One: Mapping NAICS Industries with AGE Model Sectors

The OES classifies industry sectors with 4, 5 and 6-digit NAICS, but the data at 5 and 6-digit NAICS level is not available across all sectors and occupations. The USDA census data are summarized by a mix of 4 and 5-digit NAICS codes. Thus the mapping of NAICS industries with AGE model sectors is performed at the 4- digit NAICS level.

The USAGE 2.0 model employs 67 industry sectors. We rely on an existing concordance table between 67 USAGE sectors and 2002 NAICS codes to map the data from OES and USDA with the USAGE model sectors (Appendix: Table 1).

GTAP 8 data base is classified into 57 sectors (Appendix: Table 2). Of them, 14 sectors cover agriculture, fishing and forestry. No concordance tables between the 57 GTAP sectors and the 298 NAICS industries (at 4-digit level) are ready to use. Thus we rely on the detailed descriptions of NAICS codes and GTAP sectors, 2002 USITC’s aggregation mapping for 1992 U.S. I-O sectors to GTAP sectors, as well as the existing GTAP sector references to standard classifications such as the Customs Procedure Codes (CPCs) and International Standard Industrial Classification (ISIC) codes, to determine the designation

of GTAP sector for each NAICS code reported in the OES and USDA census data (Appendix: Table 3 and 4).

NAICS is reviewed and updated every five years. Since 2002, the BLS has used NAICS 2002 and NAICS 2007 for the OES. The implementation of NAICS 2012 has already been scheduled. Although updates take place mostly at 5 and 6-digit level, when we develop the NAICS-GSC concordance table for the OES, we make any necessary adjustments.

Step Two: Split Occupational Estimates

A number of 4-digit NAICS industries correspond to more than one GTAP sectors, thus their employment estimates need to be divided between them. Currently, we divide the numbers equally between respective GTAP sectors. For instance, employment estimates from NAICS 2111 “oil and gas extraction” is equally divided between GSC16-Oil and GSC17-Gas, and employment estimates from NAICS 1111 “Oilseed and grain farming” is equally divided between four GTAP sectors: GSC1-PDR (paddy rice), GSC2-WHT (wheat), GSC3-GRO (other grains) and GSC4-OSD (oil seeds). In the future, we plan to refine this method by basing the division on annual outputs and/or labor intensities of these sectors.

Step Three: Generating Matrices by NAICS Industry and Occupation

After combining the OES and the USDA Census data and mapping NAICS industries with AGE model sectors, we are able to generate two matrices: (1) Total Employment by NAICS Industry and Occupation, and (2) Mean Annual Wages by NAICS Industry and Occupation. Here, each observation of employment, e_{ij} is an element of Total Employment, where $i \in$ the set of all NAICS industries and $j \in$ the set of all 22 SOC major occupations. Likewise, each observation of the mean wage w_{ij} is an element of Mean Wages for each NAICS industry i and SOC occupation j .

From above two matrices, we are able to obtain the third matrix- Wage Bill matrix (i.e. the matrix of labor payments) that $wb_{ij} = e_{ij} * w_{ij}$ for each NAICS industry i and SOC occupation j .

Step Four: Aggregating Employment (e_{ki}) and Wage Bill (wb_{ki}) Estimates by AGE Model Sector and Occupation

For each NAICS industry $i \in$ AGE model industry k and SOC occupation j , we generate aggregate employment: $e_{kj} = \sum_i^n e_{ij}$. Similarly, for each NAICS industry $i \in$ AGE model industry k and SOC occupation j , we generate aggregate wage bill: $wb_{kj} = \sum_i^n wb_{ij}$.

At this point, we are able to obtain two matrices: (1) Total Employment by AGE Model Sector and Occupation (shown in Appendix Tables 7, 8, 15 and 16.), and (2) Total Wage Bill by AGE Model Sector and Occupation (shown in Appendix Tables 11, 12, 19 and 20). Here, for each observation of employment, e_{kj} is an element of Total Employment, where $k \in$ the set of AGE model sectors and $j \in$ the set of all 22 SOC major occupations.

Step Five: Generating Mean Annual Wage (\bar{w}_{kj}) by AGE Model Sector and Occupation

We use $\bar{w}_{kj} = \frac{wb_{kj}}{e_{kj}}$ to obtain mean wage for each AGE model sector by major occupation group, where $k \in$ the set of AGE model sectors and $j \in$ the set of all 22 SOC major occupations. Now we have the third matrix table: 3) Mean Annual Wage by AGE Model Sector and Occupation (shown in Appendix Tables 9, 10, 17 and 18).

Step Six: Generating Shares of Wage Bill by AGE Model Sector and Occupation

Once we generate 1) total employment, 2) mean annual wage, and 3) wage bill matrices by AGE Model Sector and Occupation, we calculate shares of the wage bill for each AGE model sector k and SOC occupation j : $wb_share_{kj} = \frac{wb_{kj}}{\sum_{j=1}^{22} wb_{kj}}$. Now we have the fourth matrix table: 4) Shares of Wage Bill by AGE Model Sector and Occupation (shown in Appendix Tables 5, 6, 13 and 14).

Step Seven: Additional Calculations

Additionally, employment is calculated across SOC occupations, $e_k = \sum_{j=1}^{22} e_{kj}$, as well as across AGE model sectors, $e_j = \sum_{k=1}^n e_{kj}$ for each AGE model sector k and SOC occupation j . Wage bill sums are calculated across SOC occupations, $wb_k = \sum_{j=1}^{22} wb_{kj}$, as well as across AGE model sectors, $wb_j = \sum_{k=1}^n wb_{kj}$ for each AGE model sector k and SOC occupation j . Similarly, weighted mean wages were calculated across SOC occupations, $\bar{w}_k = \frac{\sum_{j=1}^{22} wb_{kj}}{\sum_{j=1}^{22} e_{kj}}$, as well as across AGE model sectors, $\bar{w}_j = \frac{\sum_{k=1}^n wb_{kj}}{\sum_{k=1}^n e_{kj}}$ for each AGE model sector k and SOC occupation j .

Step Eight: Plug into AGE Models

The fourth matrix, Shares of Wage Bill by AGE Model Sector and Occupation, could be used to split labor data to 22 occupations in the AGE models and they may simulate economic effects on the U.S. labor markets.

4. 2007 AND 2010 RESULT COMPARISON

At the time of writing, we have completed USAGE and GTAP labor disaggregation for 2007 and 2010. Since one of the world's worst financial crises happened between 2007 and 2010, it is interesting to compare the results from 2007 and 2010 (Appendix Tables 5-20).

Overall, U.S. businesses cut employment during this period, particularly in sectors such as construction, manufacturing, retail and motor vehicle and parts production. Low-skilled occupations suffered the most, such as production workers, office of administrative and support occupation, and construction workers. Nominal wages saw modest increases across all occupations and most sectors. Management occupations saw a noticeable increase of labor payment, as the result of rising wage and stable employment.

Because we rely on 2007 USDA Census of Agriculture for employment counts in agricultural sectors for both 2007 and 2010, the changes mostly reflect the trend in non-farm sectors.

Total Employment

From 2007 to 2010, the total U.S. employment decreased by 7.27 million.

- *By SOC Occupation Group:* The three occupation groups incurring the biggest losses in employment by number are 43-Office and administrative support occupations, 47-construction and extraction occupations, and 51-production occupations. Together they accounted for 73% of employment loss during this period. Two occupations incurring the most gains in employment are 29-health practitioners and technical occupations and 31-healthcare support occupations.

Table 2: Top employment changes by SOC

| SOC | SOC-code | 2010 EMP | 2007 EMP | Δ EMP | Δ by % |
|-----|-------------|------------|------------|-------------|--------|
| 51 | production | 8,234,350 | 10,141,830 | (1,907,480) | -19% |
| 43 | admin_supp | 21,489,300 | 23,234,210 | (1,744,910) | -8% |
| 47 | constructn | 5,059,570 | 6,693,970 | (1,634,400) | -24% |
| 25 | education | 8,449,760 | 8,313,860 | 135,900 | 2% |
| 31 | health_sup | 3,953,140 | 3,622,120 | 331,020 | 9% |
| 29 | health_prac | 7,343,300 | 6,873,690 | 469,610 | 7% |

- *By USAGE Sector:* The three sectors incurring the largest losses in employment by number are 7- construction, 28-retail trade, and 51-administrative and support services. Together they account for 58% of total U.S. employment loss during this period. The sectors incurring the largest gains in employment by number are 53-

educational services, 54-Ambulatory health care services, and 55- hospitals and nursing and residential care facilities.

The sector experiencing the largest drop in employment by percentage is 15-motor vehicle, bodies and parts (-36%), and the sector experiencing the largest gain by percentage is 62-federal government (18%).

Table 3: Top employment changes by USAGE sectors

| com65 | com65_string | com65_description | 2010 EMP | 2007 EMP | Δ EMP | Δ by % |
|-------|--------------|---|------------|------------|-------------|--------|
| 7 | Construction | Construction | 5,661,990 | 7,653,380 | (1,991,390) | -26% |
| 51 | AdminServ | Administrative and support services | 6,988,520 | 8,154,740 | (1,166,220) | -14% |
| 28 | RetailTrd | Retail trade | 14,558,450 | 15,601,050 | (1,042,600) | -7% |
| 27 | WholsaleTrd | Wholesale trade | 5,462,150 | 5,962,350 | (500,200) | -8% |
| 15 | MotVehParts | Motor vehicles, bodies and trailers, and parts | 658,560 | 1,032,170 | (373,610) | -36% |
| 62 | FedGenGov | Federal general government | 2,035,590 | 1,722,800 | 312,790 | 18% |
| 53 | EducatServ | Educational services | 12,825,810 | 12,454,050 | 371,760 | 3% |
| 54 | AmbHealthCar | Ambulatory health care services | 8,738,680 | 8,338,060 | 400,620 | 5% |
| 55 | HopsitNurs | Hospitals and nursing and residential care facilities | 3,633,120 | 3,231,490 | 401,630 | 12% |

- *By GTAP Sector:* The three sectors incurring the largest losses in employment by number are 46- construction, 47-trade and 54-business services. Together they account for 76% of total U.S. employment loss during this period. The sector incurring the largest gain in employment by number is 56-public administration, defense, education and health.

The sectors experiencing the largest drop in employment by percentage are 28-wearing apparel (-46%), 38-motor vehicles and parts (-36%), 30-wood products (-35%), 42-manufactures (-29%), 27-textiles (28%), 46-construction (-26%), and 34-mineralproducts (-26%).

Table 4: Top employment changes by GTAP sectors

| gtap | gtapcode | gtapdescription | 2010 EMP | 2007 EMP | Δ EMP | Δ by % |
|------|----------|---|------------|------------|-------------|--------|
| 46 | CNS | Construction | 5,661,990 | 7,653,380 | (1,991,390) | -26% |
| 47 | TRD | Trade | 33,533,600 | 35,458,010 | (1,924,410) | -5% |
| 54 | OBS | Business services nec | 18,140,080 | 19,717,350 | (1,577,270) | -8% |
| 38 | MVH | Motor vehicles and parts | 658,560 | 1,032,170 | (373,610) | -36% |
| 42 | OMF | Manufactures nec | 627,180 | 883,320 | (256,140) | -29% |
| 30 | LUM | Wood products | 344,890 | 530,900 | (186,010) | -35% |
| 17 | GAS | Gas | 143,973 | 140,635 | 3,338 | 2% |
| 43 | ELY | Electricity | 395,490 | 390,080 | 5,410 | 1% |
| 56 | OSG | Public Administration, Defense, Education, Health | 42,583,140 | 40,682,660 | 1,900,480 | 5% |

Mean Annual Wage:

We observe modest increase in nominal wages across all occupation groups and most sectors.

- *By SOC Occupation Group:* Each occupation group saw an increase of nominal wage, though by various amounts. The three occupation groups incurring the largest wage increases by amount are 11-management occupations, 17-architecture and engineering occupations, and 23-legal occupations. The two occupation groups incurring the smallest wage increases by amount are 39-personal care and service occupations, and 45-farming, fishing and forestry occupations.

Table 5: Top mean annual wage changes by SOC

| SOC | SOC-code | 2010 Mean A_wage | 2007 Mean A_wage | Δ Mean A_Wage | Δ by % |
|-----|-------------|------------------|------------------|---------------|--------|
| 45 | farm_occup | 22,630 | 22,164 | 466 | 2% |
| 39 | pers_care | 24,607 | 23,991 | 616 | 3% |
| 31 | health_sup | 26,933 | 25,599 | 1,335 | 5% |
| 17 | arch_enginr | 75,217 | 68,240 | 6,977 | 10% |
| 11 | management | 99,430 | 91,688 | 7,742 | 8% |
| 23 | legal | 96,882 | 88,369 | 8,513 | 10% |

- *By USAGE Sector:* The three sectors incurring the largest wage increases are 3-oil and gas extraction, 24-petroleum and coal products, and 44-funds, trusts and other financial vehicles. The sectors incurring the largest wage decreases are 29-air transportation, and 30-rail transportation.

Table 6: Top mean annual wage changes by USAGE sectors

Wage Bill

We observe that the 2010 wage bill is slightly higher than the 2007 wage bill by roughly \$180 billion, or 3%.

- *By SOC Occupation Group:* The two occupation groups incurring the largest increases of wage bill are 29-health practitioners and technical occupations and 11-management occupations. The former is largely due to gains in employment; the latter is largely due to rising wages as its total employment remained stable. The two occupation groups incurring the largest declines in wage bill are 47-construction and 51-production, largely due to the deep losses in employment.

Table 8: Top wage bill changes by SOC

| SOC | SOC-code | 2010 WB | 2007 WB | Δ WB | Δ by % |
|-----|-------------|---------|---------|----------|--------|
| 47 | constructn | 222,225 | 271,933 | (49,708) | -18% |

| 29 | health_prac | 523,093 | 446,674 | 76,419 | 17% |

- *By USAGE Sector:* The sectors incurring the largest wage bill increases are 53-educational services, 54-Ambulatory health care services, 62-federal government, and 64-state and local general government, due to employment gains in these sectors. The sectors incurring the largest wage bill declines are 7-construction, 15-motor vehicles and parts, 28-retail trade, and 51-administrative and support services, largely due to employment losses.

Table 9: Top wage bill changes by USAGE sectors

5. FUTURE WORK

Our future work may focus on three major aspects: 1) improving the current methodology; 2) trying simulations in AGE models; and 3) establishing time series for AGE models.

5.1 Improving the Current Methodology

- *Mapping NAICS with AGE model sectors:* The most accurate mapping for NAICS 1151 “Support activities for crop production” and 1152 “Support activities for animal production” remains open for debate. These sectors do not have the exactly corresponding GTAP sectors. To be consistent with the 2002 USITC’s aggregation mapping for 1992 U.S. I-O sectors to GTAP sectors which assigned agricultural service to GSC56, we map these two NAICS sectors with GSC56-OSG (public administration, defense, education and health). However, it might be more appropriate to assign them to GSC54-OBS (other business services), or split them among GTAP agricultural sectors that produce crops and animals.
- *Dividing employment estimates between GTAP sectors:* A number of 4-digit NAICS industries correspond to more than one GTAP sectors, thus their employment estimates need to be divided among respective GTAP sectors. Currently, we divide the numbers equally between them. In the future, we would like to refine the method by basing the division upon outputs and/or labor intensity of these GTAP sectors. This may require more detailed data.
- *Updating the USDA census data:* The BLS conducts the OES semi-annually on a rolling basis, and publishes its occupational estimates each year. On the other hand, the USDA conducts the Census of Agriculture every five years, with the latest one in 2007. For 2007 labor disaggregation, we have 2007 data from both OES and the Census. For 2010 labor disaggregation, although we could obtain 2010 data from 2010 OES and are able to use the wage estimate from the OES for farm operators, we still have to rely on the data from 2007 Census of Agriculture

for employment counts for hired farm labor and farm operators as well as the calculation of mean annual wage for hired farm labor. The data inconsistency in employment and wage estimates for agricultural sectors is a problem that needs to be addressed. One potential solution is to use the employment counts for hired farm labor and farm operators in 2007 Census of Agriculture as the baseline and to adjust employment numbers for each following year according to the annual outputs for that year.

- *Disaggregating Occupations further:* By incorporating 22 occupational groups into the AGE models, the level of detail is expansive enough that shocks to the models produce distinct and characteristic results. Understanding the detailed occupations underlying each major group allows for a deeper comprehension of how shocks influence occupation sub-groups in different ways. For instance, SOC-47, “construction and extraction occupations”, includes construction workers such as construction labor, electricians, and carpenters, as well as extraction workers such as mining machine operators, and derrick operators for oil and gas. SOC-51, “production occupations”, includes food processing workers, metal and plastic workers, textile and apparel workers, and medical appliance technicians. These occupation sub-groups differ from each other in terms of industry and skill level. They might very well be affected by trade policies in distinctive ways. Yet, such distinctions are lost in our current 2-digit SOC level aggregation. Investigating labor at 3-digit SOC level for targeted industry sectors may also prove worthwhile.

5.2 Testing the results in AGE model simulations

Current efforts are underway to integrate the matrix of labor payment shares into the GTAP and USAGE 2.0 AGE models. Illustrative results with the GTAP model are discussed in Carrico and Tsigas (2012).

5.3 Establishing time series for AGE models

We plan to establish time series of labor disaggregation matrices for AGE models and update them yearly. Based on the availability of OES and USDA data, it is possible to go back as early as 1998.

Table 2: GTAP Sector List

| Number | Code | Description |
|--------|------|---|
| 1 | pdr | Paddy Rice: rice, husked and unhusked |
| 2 | wht | Wheat: wheat and meslin |
| 3 | gro | Other Grains: maize (corn), barley, rye, oats, other cereals |
| 4 | v_f | Veg & Fruit: vegetables, fruit/vegetables, fruit and nuts, potatoes, cassava, truffles, |
| 5 | osd | Oil Seeds: oil seeds and oleaginous fruit; soy beans, copra |
| 6 | c_b | Cane & Beet: sugar cane and sugar beet |
| 7 | pfb | Plant Fibres: cotton, flax, hemp, sisal and other raw vegetable materials used in textiles |
| 8 | ocr | Other Crops: live plants; cut flowers and flower buds; flower seeds and fruit seeds; vegetable seeds, beverage and spice crops, unmanufactured tobacco, cereal straw and husks, unprepared, whether or not chopped, ground, pressed or in the form of pellets; swedes, mangolds, fodder roots, hay, lucerne (alfalfa), clover, sainfoin, forage kale, lupines, vetches and similar forage products, whether or not in the form of pellets, plants and parts of plants used primarily in perfumery, in pharmacy, or for insecticidal, fungicidal or similar purposes, sugar beet seed and seeds of forage plants, other raw vegetable materials |
| 9 | ctl | Cattle: cattle, sheep, goats, horses, asses, mules, and hinnies; and semen thereof |
| 10 | oop | Other Animal Products: swine, poultry and other live animals; eggs, in shell (fresh or cooked), natural honey, snails (fresh or preserved) except sea snails; frogs' legs, edible products of animal origin n.e.c., hides, skins and furskins, raw, insect waxes and spermaceti, whether or not refined or coloured |
| 11 | rmk | Raw milk |
| 12 | wol | Wool: wool, silk, and other raw animal materials used in textile |
| 13 | frs | Forestry: forestry, logging and related service activities |
| 14 | fsh | Fishing: hunting, trapping and game propagation including related service activities, fishing, fish farms; service activities incidental to fishing |
| 15 | col | Coal: mining and agglomeration of hard coal, lignite and peat |
| 16 | oil | Oil: extraction of crude petroleum and natural gas (part), service activities incidental to oil and gas extraction excluding surveying (part) |
| 17 | gas | Gas: extraction of crude petroleum and natural gas (part), service activities incidental to oil and gas extraction excluding surveying (part) |
| 18 | omm | Other Mining: mining of metal ores, uranium, gems. other mining and quarrying |
| 19 | cmt | Cattle Meat: fresh or chilled meat and edible offal of cattle, sheep, goats, horses, asses, mules, and hinnies. raw fats or grease from any animal or bird. |
| 20 | omt | Other Meat: pig meat and offal. preserves and preparations of meat, meat offal or blood, flours, meals and pellets of meat or inedible meat offal; greaves |
| 21 | vol | Vegetable Oils: crude and refined oils of soya-bean, maize (corn), olive, sesame, ground-nut, olive, sunflower-seed, safflower, cotton-seed, rape, colza and canola, mustard, coconut palm, palm kernel, castor, tung jojoba, babassu and linseed, perhaps partly or wholly hydrogenated, inter-esterified, re-esterified or elaidinised. Also margarine and similar preparations, animal or vegetable waxes, fats and oils and their fractions, cotton linters, oil-cake and other solid residues resulting from the extraction of vegetable fats or oils; flours and meals of oil seeds or oleaginous fruits, except those of mustard; degras and other residues resulting from the treatment of fatty substances or animal or vegetable waxes. |
| 22 | mil | Milk: dairy products |
| 23 | prc | Processed Rice: rice, semi- or wholly milled |
| 24 | sgr | Sugar |
| 25 | ofd | Other Food: prepared and preserved fish or vegetables, fruit juices and vegetable juices, prepared and preserved fruit and nuts, all cereal flours, groats, meal and pellets of wheat, cereal groats, meal and pellets n.e.c., other cereal grain products (including corn flakes), other vegetable flours and meals, mixes and doughs for the preparation of bakers' wares, starches and starch products; sugars and sugar syrups n.e.c., preparations used in animal feeding, bakery products, cocoa, chocolate and sugar confectionery, macaroni, noodles, couscous and similar farinaceous products, food products n.e.c. |
| 26 | b_t | Beverages and Tobacco products |
| 27 | tex | Textiles: textiles and man-made fibres |
| 28 | wap | Wearing Apparel: Clothing, dressing and dyeing of fur |
| 29 | lea | Leather: tanning and dressing of leather; luggage, handbags, saddlery, harness and footwear |
| 30 | jum | Lumber: wood and products of wood and cork, except furniture; articles of straw and plaiting materials |
| 31 | ppp | Paper & Paper Products: includes publishing, printing and reproduction of recorded media |
| 32 | p_c | Petroleum & Coke: coke oven products, refined petroleum products, processing of nuclear fuel |
| 33 | crp | Chemical Rubber Products: basic chemicals, other chemical products, rubber and plastics products |
| 34 | nmm | Non-Metallic Minerals: cement, plaster, lime, gravel, concrete |
| 35 | l_s | Iron & Steel: basic production and casting |
| 36 | nfm | Non-Ferrous Metals: production and casting of copper, aluminium, zinc, lead, gold, and silver |
| 37 | fmp | Fabricated Metal Products: Sheet metal products, but not machinery and equipment |
| 38 | mvh | Motor Motor vehicles and parts: cars, lorries, trailers and semi-trailers |
| 39 | otn | Other Transport Equipment: Manufacture of other transport equipment |
| 40 | ele | Electronic Equipment: office, accounting and computing machinery, radio, television and communication equipment and apparatus |
| 41 | ome | Other Machinery & Equipment: electrical machinery and apparatus n.e.c., medical, precision and optical instruments, watches and clocks |
| 42 | omf | Other Manufacturing: includes recycling |
| 43 | ely | Electricity: production, collection and distribution |
| 44 | gdt | Gas Distribution: distribution of gaseous fuels through mains; steam and hot water supply |
| 45 | wtr | Water: collection, purification and distribution |
| 46 | cns | Construction: building houses factories offices and roads |
| 47 | trd | Trade: all retail sales; wholesale trade and commission trade; hotels and restaurants; repairs of motor vehicles and personal and household goods; retail sale of automotive fuel |
| 48 | otp | Other Transport: road, rail ; pipelines, auxiliary transport activities; travel agencies |
| 49 | wtp | Water transport |
| 50 | atp | Air transport |
| 51 | cmn | Communications: post and telecommunications |
| 52 | ofi | Other Financial Intermediation: includes auxiliary activities but not insurance and pension funding (see next) |
| 53 | lsr | Insurance: includes pension funding, except compulsory social security |
| 54 | obs | Other Business Services: real estate, renting and business activities |
| 55 | ros | Recreation & Other Services: recreational, cultural and sporting activities, other service activities; private households with employed persons (servants) |
| 56 | osg | Other Services (Government): public administration and defense; compulsory social security, education, health and social work, sewage and refuse disposal, sanitation and similar activities, activities of membership organizations n.e.c., extra-territorial organizations and bodies |
| 57 | dwe | Dwellings: ownership of dwellings (imputed rents of houses occupied by owners) |
