UNITED STATES INTERNATIONAL TRADE COMMISSION

PURPOSE AND SCOPE

This annual report for 2013 contains a compilation of the statistical reports published every two weeks by the Commission on the volume, value, unit value, and import market share of imports from China that were subject to the provisions of the 2005 U.S.-China Memorandum of Understanding Concerning Trade in Textiles and Apparel (MOU). This compilation includes official import data from the U.S. Department of Commerce, and shows data at the 3-digit textile/apparel category level and by the Harmonized Tariff Schedule (HTS) 10-digit subheadings in these categories. The Commission posts updated reports every two weeks on its website at:

www.usitc.gov/research_and_analysis/What_We_Are_Working_On.htm

The Commission prepares reports every two weeks, as well as annual compilations in response to a request from the House Committee on Ways and Means received on October 14, 2008, pursuant to section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)). The Commission instituted investigation No. 332-501, *Textile and Apparel Imports from China: Statistical Reports*, for the purpose of preparing these reports.

For further information about this investigation, contact:

Andrea Boron (202-205-3433, andrea.boron@usitc.gov)
David Lundy (202-205-3439, david.lundy@usitc.gov)

The United States International Trade Commission (www.usitc.gov) is an independent, quasijudicial federal agency with broad investigative responsibilities on matters of trade. The agency investigates the effects of dumped and subsidized imports on domestic industries and conducts global safeguard investigations. The Commission also adjudicates cases involving alleged infringement by imports of intellectual property rights. Through such proceedings, the agency helps to support a rules-based international trading system. The Commission also serves as a federal resource where trade data and other trade policy-related information are gathered and analyzed. The information and analysis are provided to the President, the Office of the United States Trade Representative (USTR), and Congress to facilitate the development of sound and informed U.S. trade policy. The Commission makes most of its information and analysis available to the public to promote understanding of international trade issues.

TEXTILE AND APPAREL IMPORTS FROM CHINA: STATISTICAL REPORTS
Annual Compilation 2013

Introduction

The textile and apparel import data in this report are presented by 3-digit category numbers and combinations thereof (scroll down this sheet to view a list of these categories), as well as by 10-digit HTS (HTS10) subheading. The HTS10 subheadings in each category are based on a correlation maintained by the Office of Textiles and Apparel, U.S. Department of Commerce. Click on the following link for this correlation:

[Textile and apparel correlation to HTS10 items](#)

The import data presented here are only for the items that were subject to the 2005 Memorandum of Understanding. These HTS10 items are specified in the document at the following link:

[MOU quota HTS10 items](#)

The data in this report are shown on an annual and quarterly basis by categories and individual HTS10 subheadings. The time frames are:

By category:

Annual data	2007 through 2013
Quarterly data	First quarter 2012 through fourth quarter 2013

By HTS10 subheading:

Annual data	2011 through 2013 (see note below)
Quarterly data	First quarter 2012 through fourth quarter 2013

The annual time frame for presenting the data by HTS10 subheading is limited, compared with category data, because valid subheadings may change from year to year as a result of revisions to the HTS. (Typically, HTS10 subheadings are superseded by new HTS10 subheadings as a result of statistical breakouts or changes to the HTS that are necessary pursuant to HS revisions by the World Customs Organization.) Major subheading changes occurred in 2007 and again in 2012. Minor changes have occurred in the interim years. Only data for subheadings valid during the entire time frame of this report are shown to ensure that only meaningful trends are presented.

For data for all HTS10 subheadings for all years, go to the biweekly report. Click on the link below and scroll down to find this report:

Contents

Import data can be found on the data sheets that follow this sheet. Navigate to these data using the links below or the tabs at the bottom of the screen. Each data sheet has columns that show absolute and percentage change for the latest period as compared with the beginning period (scroll to the right if these columns are not visible). A "Not applicable" in the percentage change column indicates that a value cannot be calculated because the value in the beginning period is zero.

Each data sheet also has a filtering feature on line 4 that can be used to isolate or sort the data. Use the filter in the index column (sort ascending option) to return the sheet to its original order.
