I. Abstract

The House Committee on Ways and Means (the Committee) has directed the Commission to produce a report that examines relevant factors affecting global competitiveness of the U.S. aluminum industry. The Committee has requested that the report (1) provide an overview of the aluminum industry in the United States and other major global producing and exporting countries; (2) describe recent trends and developments in the global market for aluminum; (3) compare competitive strengths and weaknesses of aluminum production and exports in the United States and other major producing and exporting countries; (4) identify factors driving capacity and related production changes in countries where unwrought aluminum capacity has significantly increased; and (5) assess the impact of government policies and programs in major foreign aluminum producing and exporting countries. The Committee has anticipated the need for questionnaires in order to develop detailed information on the domestic aluminum market and industry.

II. Method of Collection

Respondents will be mailed a letter directing them to download and fill out a form-fillable PDF questionnaire. Respondents will also receive a follow-up email. Once complete, respondents may submit it by uploading it to a secure webserver, emailing it to the study team, faxing it, or mailing a hard copy to the Commission.
