OFFICE OF INVESTIGATIONS

UNITED STATES INTERNATIONAL TRADE COMMISSION

WASHINGTON, DC 20436

January 8, 2010

To Whom It May Concern:

The enclosed questionnaire pertains to the United States International Trade Commission's investigations concerning prestressed concrete steel wire strand ("PC strand"). The investigations are being conducted under the provisions of sections 701 and 731 of the Tariff Act of 1930.

In these investigations the Commission must determine whether an industry in the United States is materially injured or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from China of PC strand that have been found to be subsidized and sold in the United States at less than fair value. A copy of the Commission's scheduling notice of the final phase of these investigations will be published in the *Federal Register*.

The business proprietary information you supply in this questionnaire or in connection therewith will be so treated by the Commission and will not be disclosed except as may be required by law. Your response will be consolidated with the responses of other firms and will form much of the statistical base for the Commission's determinations. The questions in the questionnaire have been reviewed with market participants to ensure that issues of concern are adequately addressed and that data requests are sufficient, meaningful, and as limited as possible.

Please return the completed questionnaire to the Commission by no later than **March 5, 2010**. If you have any questions concerning the questionnaire or other matters related to the investigations, please contact Mary Messer (phone: 202-205-3193 or email: mary.messer@usitc.gov) of the Commission's staff. Correspondence may be sent to the above address or via FAX to 202-205-3205.

Sincerely,

/s/
