Certain Amorphous Silica Fabric From China; Determinations

On the basis of the record¹ developed in the subject five-year reviews, the United States International Trade Commission ("Commission") determines, pursuant to the Tariff Act of 1930 ("the Act"), that revocation of the countervailing and antidumping duty orders on certain amorphous silica fabric from China would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.

Background

The Commission instituted these reviews on February 1, 2022 (87 FR 5511) and determined on May 9, 2022, that it would conduct expedited reviews (87 FR 53488, August 31, 2022).

The Commission made these determinations pursuant to section 751(c) of the Act (19 U.S.C. 1675(c)). It completed and filed its determinations in these reviews on September 22, 2022. The views of the Commission are contained in USITC Publication 5368 (September 2022), entitled *Certain Amorphous Silica Fabric from China: Investigation Nos. 701-TA-555 and 731-TA-1310 (Review)*.

BILLING CODE 7020-02-P

DEPARTMENT OF JUSTICE

Federal Bureau of Prisons

Notice of Intent To Prepare a Draft Environmental Impact Statement for the Proposed Federal Correctional Institution and Federal Prison Camp in Letcher County, Kentucky

AGENCY: Federal Bureau of Prisons, U.S. Department of Justice.

ACTION: Notice of intent to prepare a Draft Environmental Impact Statement for the Proposed Federal Correctional Institution and Federal Prison Camp in Letcher County, Kentucky.

SUMMARY: Pursuant to the National Environmental Policy Act (NEPA) of 1969, as implemented by the Council on Environmental Quality and Federal Bureau of Prisons (Bureau) regulations, the Bureau announces its intent to prepare a Draft Environmental Impact Statement (DEIS) for the "Proposed Federal Correctional Institution and Federal Prison Camp Letcher County, Kentucky."

SUPPLEMENTARY INFORMATION:

Background

The Bureau's mission is to protect society by confining offenders in the controlled environments of prisons and community-based facilities that are safe, humane, cost-efficient, appropriately secure, and provide work and other self-improvement opportunities to assist offenders in becoming law-abiding citizens. A growing challenge to successfully performing that mission is the increasing number of federal correctional facilities and supporting infrastructure that were constructed over 50 years ago (the approximate design life of such facilities), resulting in a continuous need to maintain existing facilities, and when necessary,

develop new facilities and infrastructure.

To address the need for modern, efficient, and cost-effective institutions, the Bureau is proposing to construct and operate a new medium-security Federal Correctional Institution (FCI) and an adjoining minimum-security Federal Prison Camp (FPC) in Letcher County, Kentucky. The FCI and FPC would be designed to house approximately 1,152 adult males and 256 adult males, respectively, and serve the needs of the Bureau's Mid-Atlantic Region.

Compliance With the National Environmental Policy Act

Development and operation of a new FCI and FPC is considered to be an action potentially significantly affecting the quality of the human environment. Therefore, the Bureau must comply with NEPA to ensure that the environmental consequences of such a federal action are adequately considered. This DEIS will be prepared to ensure that the potential environmental impacts associated with the proposed action are thoroughly documented and that compliance is achieved with NEPA as well as with other environmental statutes including but not limited to: the Coastal Zone Management Act of 1972; the Clean Air Act of 1974; the Clean Water Act and Amendments, the Endangered Species Act of 1973 (ESA); the National Historic Preservation Act (NHPA) of 1966; and the Farmland Protection Policy Act (FPPA), among other laws, regulations and Executive Orders.

Preparation of environmental documentation and its consideration by federal, state, and local officials, regulatory agencies, stakeholders, and the public will be carried out to demonstrate that the Bureau understands and fully considers the potential environmental impacts associated with the proposed action. This includes consideration to the potential impacts associated with correctional institution construction and operation and attainment of the project's objectives.

In 2006, Congress authorized and directed the Bureau to initiate various investigations for development of a new federal correctional facility in Letcher County. In accordance with Congress' directive, the Bureau conducted a wide range of technical investigations and studies and published multiple EISs in conformance with NEPA as summarized below.
