III. Other product information, including uses/applications and source(s) of imports

The subject products are placebos composed of potassium phosphate, potassium hydroxide, sucrose, and polysorbate 80. Placebos are used as a control in clinical drug trials to determine the effectiveness of a medicinal drug.

The subject placebos are used in a drug trial for a drug assigned the code ASP2408. The subject product is provided for in HTS subheading 2106.90.99, which is a basket category for food preparations not elsewhere specified or included. U.S. imports under HTS subheading 2106.90.99 totaled \$1.6 billion in 2011, about one-third of these imports were from Canada and about 9 percent were from Mexico and Thailand each.

IV. Estimated effect on customs revenue

Note: Customs revenue loss is provided for 5 years, although the effective period of the proposed legislation may differ. Regarding the HTS subheading listed in the article description of the bill, the Commission may express an opinion on the HTS classification of a product to facilitate consideration of the bill. However, by law, only U.S. Customs and Border Protection is authorized to issue a binding ruling on this matter. The Commission believes that Customs should be consulted prior to enactment of the bill.
