II. Suggested article description(s) for enactment (including appropriate HTS subheading(s)):

Fluoropolymers containing 95 percent or more by weight of any combination of all three of the following monomer units: tetrafluoroethylene, hexafluoropropylene, and vinylidene fluoride (provided for in subheading 3904.69.50)

(If enacted, the tariff relief provided for in this bill would be available to any entity that imports the product that is covered by the bill.)

Description above compared with bill as introduced:

- Same
- Different (see Technical Comments section)

III. Other product information, including uses/applications and source(s) of imports

The subject product is a melt-processable fluoroplastic used in a variety of applications, including permeation and chemical barriers in automotive hose and tubing, flexible tank linings, and in analytical instrumentation and water purification systems. The product is imported from Germany.

IV. Estimated effect on customs revenue

Subject product HTS subheading(s)	3904.69.50				
Item	2013	2014	2015	2016	2017
Col.1-general rate of duty or percentage point reduction (%)	6.5	6.5	6.5	6.5	6.5

Note: Customs revenue loss is provided for 5 years, although the effective period of the proposed legislation may differ. Regarding the HTS subheading listed in the article description of the bill, the Commission may express an opinion on the HTS classification of a product to facilitate consideration of the bill. However, by law, only U.S. Customs and Border Protection is authorized to issue a binding ruling on this matter. The Commission believes that Customs should be consulted prior to enactment of the bill.

Dutiable imports were based on (more than one may apply):

- Official statistics of the U.S. Department of Commerce
- Provided by industry sources
- Industry information
- Commission estimates

Duty reduction notes:

- This bill is not a duty reduction
- This bill is a temporary duty reduction. Rates are shown below.

Col.1-general duty rate (%) Temporary rate (%) Percentage point reduction (%)

V. Technical comments

The modified article description reflects an agreement on wording reached between the interested entity and Solvay Solexis, a producer of polymers who produces a polymer in the United States from one of the monomers (but not the combination).
