

Review of Five-Year-Old Statistical Tariff Provisions

In May of 2016, the 484(f) Committee established a five-year review process for statistical reporting numbers established by the Committee in the Harmonized Tariff Schedule (HTS) and Schedule B. The purpose is to ensure that there is still sufficient trade in these statistical breakouts and that they are continuing to meet the needs of the original requesters and the larger trade community. This review process was scheduled to begin in the spring of 2021.

In February 2021, the original requesters of the statistical breakouts that were established on July 1, 2016, were contacted by the 484(f) Committee and asked to submit a renewal request to the Committee. Requesters were also invited to modify the provisions approved by the Committee in the spring of 2016, if they believe that current circumstances warrant such modification. The list of statistical breakouts being reviewed is shown in the table below.

The 484(f) Committee also welcomes comments and suggestions from other interested firms. All submissions should be sent to 484f@usitc.gov by May 1, 2021.
