**DEFINITIONS**

***Ball bearings and parts thereof.***-- The subject merchandise includes all antifriction bearings that employ balls as the rolling element (whether ground or unground) and parts thereof, and certain other imported goods containing such bearings, as described herein. Imports of these products are classified under the following categories: antifriction balls, ball bearings with integral shafts and parts thereof, ball bearings (including thrust, angular contact, and radial ball bearings) and parts thereof, and housed or mounted ball bearing units and parts thereof.

Size or precision grade of a bearing does not influence whether the bearing is covered by the petition. The petition covers all the subject bearings and parts thereof (inner ring, outer ring, cage, balls, seals, shields, etc.) outlined above with certain limitations. With regard to finished parts, all such parts are included in the scope of the petition. For unfinished parts, such parts are included if (1) they have been heat-treated prior to importation into the United States, or (2) heat treatment is not required to be performed on the part. Thus, the only unfinished parts that are not covered by the petition are those that will be subject to heat treatment after importation into the United States. The ultimate application of a bearing also does not influence whether the bearing is covered by the petition. Bearings designed for highly specialized applications are included. Any of the subject bearings, regardless of whether they may ultimately be utilized in parts of aircraft, automobiles, or other machines or equipment, are within the scope of the petition.

Imports of the subject merchandise are classified under the following Harmonized Tariff Schedules of the United States ("HTS") subheadings:

3926.90.45, 4016.93.00, 4016.93.10, 4016.93.50, 6909.19.50, 8431.20.00,

8708.99.06, 8708.99.31, 8708.99.40, 8708.99.49, 8708.99.58, 8708.99.80,  
8803.10.00, 8803.20.00, 8803.30.00, 8803.90.30, and 8803.90.90.

The HTS item numbers are provided for convenience and customs purposes. They are not intended to determine which of the products are subject to the petition. The written description remains dispositive.

***Ball bearing balls.***-- Spherical rolling elements for use in ball bearings, including ground and unground balls. All FINISHED balls are included in the scope of the investigation; however, UNFINISHED balls are included only if they are heat treated, or if heat treatment is not required to be performed on the ball. Thus, the only unfinished balls that are not covered are those that will be subject to heat treatment after importation into the United States.
