MBDA will review each of the MBEC's overall performance ratings as evaluated through the standardized performance reports and assessments required under the MBEC Program to determine which projects will be offered an extension. MBDA will prioritize those MBEC awards meeting the above criteria that also have current award periods scheduled to end on or before January 31, 2010. In addition, although MBDA is allowing the award period for all of the above-referenced MBEC projects to be extended, it is possible that not all projects will be offered an extension and that some or all awards will be extended for less than a nine-month period.

A total of approximately \$1.1 million in FY 2010 funds is available under the Consolidated Appropriations Act, 2010, Public Law 111-117, to fund award extensions for the MBEC projects referenced in this notice. MBDA also anticipates that additional appropriated funds will be available in FY 2011 to fund award extensions for those MBEC projects not receiving extensions during FY 2010. In no event will MBDA or the Department of Commerce be responsible for any costs incurred outside of the current award period by the incumbent operators of the MBEC projects affected by this notice if the MBEC Program fails to receive funding, or if an award extension is not made because of other MBDA or Department of Commerce priorities. Publication of this announcement does not obligate MBDA or the Department of Commerce to award any extensions or to obligate any available funds.

Hot-Rolled Flat-Rolled Carbon-Quality Steel Products from Brazil and Japan: Final Results of Expedited Sunset Reviews of the Antidumping Duty Orders

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On April 1, 2010, the Department of Commerce (the Department) initiated sunset reviews of the antidumping duty orders on hot-rolled flat-rolled carbon-quality steel products from Brazil and Japan, pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act). The Department has conducted expedited (120-day) sunset reviews for both orders pursuant to 19 CFR 351.218(e)(1)(ii)(C)(2). As a result of these sunset reviews, the Department finds that revocation of the antidumping duty orders would be likely to lead to continuation or recurrence of dumping. **EFFECTIVE DATE:** August 6, 2010.

FOR FURTHER INFORMATION CONTACT: Jacqueline Arrowsmith or Milton Koch, AD/CVD Operations, Office 6, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230;

SUPPLEMENTARY INFORMATION:

Background

On April 1, 2010, the Department published the notice of initiation of the second sunset reviews of the antidumping duty orders on hot-rolled flat-rolled carbon-quality steel products from Brazil and Japan pursuant to section 751(c) of the Act. See *Initiation of Five-Year ("Sunset") Review*, 75 FR 16437 (April 1, 2010).

The Department received notices of intent to participate on behalf of United States Steel Corporation, Nucor Corporation, Gallatin Steel, SSAB N.A.D., Steel Dynamics, Inc., and ArcelorMittal USA Inc. (collectively "domestic interested parties"), within the deadline specified in 19 CFR 351.218(d)(1)(i). The companies claimed interested party status under section 771(9)(C) of the Act as producers of the subject merchandise in the United States.

The Department received an adequate substantive response to the notice of initiation from the domestic interested parties within the deadline specified in 19 CFR 351.218(d)(3)(i). We received no substantive responses from respondent interested parties with respect to either of the orders covered by these sunset reviews. As a result, pursuant to 19 CFR 351.218(e)(1)(ii)(C)(2), the Department has conducted expedited (120-day) sunset reviews of the antidumping duty orders on hot-rolled flat-rolled carbon-quality steel products from Brazil and Japan.

Scope of the Orders

The products covered by the antidumping duty orders are certain hot-rolled flat-rolled carbon-quality

steel products of a rectangular shape, of a width of 0.5 inch or greater, neither clad, plated, nor coated with metal and whether or not painted, varnished, or coated with plastics or other non-metallic substances, in coils (whether or not in successively superimposed layers) regardless of thickness, and in straight lengths, of a thickness less than 4.75 mm and of a width measuring at least 10 times the thickness. Universal mill plate (*i.e.*, flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm, but not exceeding 1250 mm and of a thickness of not less than 4 mm, not in coils and without patterns in relief) of a thickness not less than 4.0 mm is not included within the scope of the orders.

Specifically included in the scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, and the substrate for motor lamination steels. IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum.

Steel products to be included in the scope of the orders, regardless of Harmonized Tariff Schedule of the United States (HTSUS) definitions, are products in which: 1) iron predominates, by weight, over each of the other contained elements; 2) the carbon content is 2 percent or less, by weight; and 3) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

1.80 percent of manganese, or 1.50 percent of silicon, or 1.00 percent of copper, or 0.50 percent of aluminum, or 1.25 percent of chromium, or 0.30 percent of cobalt, or 0.40 percent of lead, or 1.25 percent of nickel, or 0.30 percent of tungsten, or 0.012 percent of boron, or 0.10 percent of molybdenum, or 0.10 percent of niobium, or 0.41 percent of titanium, or 0.15 percent of vanadium, or 0.15 percent of zirconium.

All products that meet the physical and chemical description provided above are within the scope of the orders unless otherwise excluded. The following products, by way of example, are outside and/or specifically excluded from the scope of the orders:

- Alloy hot-rolled steel products in which at least one of the chemical elements exceeds those listed above (including *e.g.*, ASTM specifications A543, A387, A514, A517, and A506).

Analysis of Comments Received

All issues raised in these reviews are addressed in the "Issues and Decision Memorandum: Final Results of Expedited Sunset Reviews of the Antidumping Duty Orders on Hot-Rolled Flat-Rolled Carbon-Quality Steel Products from Brazil and Japan" from Edward C. Yang, Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Ronald K. Lorentzen, Deputy Assistant Secretary for Import Administration, dated concurrently with this notice ("Issues and Decision Memorandum"), which is hereby adopted by this notice. The issues discussed in the Issues and Decision Memorandum include the likelihood of continuation or recurrence of dumping and the magnitude of the margins likely to prevail if the orders were revoked. Parties can find a complete discussion of all issues raised in these reviews and the corresponding

recommendations in this public memorandum which is on file in the Central Records Unit, room 1117 of the main Commerce Department building.

In addition, a complete version of the Issues and Decision Memorandum can be accessed directly on the Internet at <http://ia.ita.doc.gov/frn>. The paper copy and electronic version of the Issues and Decision Memorandum are identical in content.

Final Results of Reviews

We determine that revocation of the antidumping duty orders on hot-rolled flat-rolled carbon-quality steel products from Brazil and Japan would be likely to lead to continuation or recurrence of dumping at the following weighted-average percentage margins:

| Producer/Exporter for Brazil | Weighted Average Margin |
|--|-------------------------|
| Companhia Siderurgica Nacional Usinas Siderurgicas de Minas Gerais | 41.27% |
| Companhia Siderurgica Paulista | 43.40% |
| All Others | 42.12% |
| Producer/Exporter for Japan | Weighted Average Margin |
| Kawasaki Steel Corporation | 40.26% |
| NKK Corporation | 17.70% |
| Nippon Steel Corporation | 19.95% |
| All Others | 22.92% |

This notice also serves as the only reminder to parties subject to administrative protective orders (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of the return or destruction of APO materials or conversion to judicial protective orders is hereby requested. Failure to comply with the regulations and terms of an

APO is a violation which is subject to sanction.

We are issuing and publishing the results and notice in accordance with sections 751(c), 752(c), and 777(i)(1) of the Act.
