

EXPLANATION OF COMMISSION DETERMINATION ON ADEQUACY

in

Chlorinated Isocyanurates from China
Inv. No. 701-TA-501 (Review)

On January 6, 2020, the Commission determined to conduct an expedited five-year review in the above-referenced proceeding pursuant to section 751(c)(3)(B) of the Tariff Act of 1930, as amended, 19 U.S.C. § 1675(c)(3)(B).

The Commission received a joint response to its notice of institution filed on behalf Bio-Lab, Inc., Clearon Corp., and Occidental Chemical Corporation (collectively, “the domestic interested parties”), domestic producers of chlorinated isocyanurates (“chlorinated isos”). The Commission found that the individual responses from the domestic interested parties were adequate. Because the domestic interested parties accounted for [all] domestic production of powdered/granular chlorinated isos in 2018, the Commission determined that the domestic interested party group response was adequate.

The Commission did not receive a response to the notice of institution from any respondent interested party. The Commission therefore determined that the respondent interested party group response was inadequate.

The Commission did not find any circumstances that would warrant conducting a full review. The Commission therefore determined to conduct an expedited review of this order.¹

A record of the Commissioners’ votes is available from the Office of the Secretary and the Commission’s website (www.usitc.gov).

¹ Commissioner Jason E. Kearns did not participate in this determination.
